# What is Wordle useful for ?

- Gives a good Overview
  - as reminders, reinforces existing knowledge, as 'memento' (~50% users of wordle)
  - as learning aids
    - used by educators
- Emotional visualization !
  - marriage vows

# What is Wordle not useful for ?

- Standalone learning tool
  - prior knowledge required
- Discovering new information
- Interactive visualization

# Design implications of Wordle

- Creating mass visualizations
  - Low cost of entry
  - Portability or Sharing
  - Aesthetics  $\sim$  Usability

# Types of Text Visualizations

- Visualizing relationships among huge document collections
  - Targetted more at experts
  - Discovering previously unknown information is key
- Visualizing structure of a document
  - Unlikely to discover new knowledge
  - act as aids to reinforce existing knowledge
- Visualizing literature and citation relationships

# The 2007 State of the Union Address

Over the years, President Bush's State of the Union address has averaged almost 5,000 words each, meaning the the President has delivered over 34,000 words. Some words appear frequently while others appear only sporadically. Use the tools below to analyze what Mr. Bush has said.

## Use of the phrase "Tax" in past State of the Union Addresses

### The word in context

I believe in local control of schools. We should not, and we will not, run public schools from Washington, D.C. Yet when the federal government spends **TAX** dollars, we must insist on results. Children should be tested on basic reading and math skills every year between grades three and eight. Measuring is the only way to know whether all our children are learning. And I want to know, because I refuse to leave any child behind in America.

-- 2001 (Paragraph 14 of 73)

[Next Instance of 'Tax'](#)

SeeSoft-style visualization

## Compared with other words

\* As a newly elected president, Mr. Bush did not deliver a formal State of the Union address in 2001. His Feb. 27 speech to a joint session of Congress was analogous to the State of the Union, but without the title.

# Themeriver

- can get good overview with help of markers

## Drawbacks:

- not much useful without prior knowledge on the topics/markers
- scalability of number of topics - reuse of colors
- less avenues for user interaction
  - high cost of processing
- evaluation with 2 users

# Docuburst

- What if
  - tagclouds + lexical semantic hierarchy = ?

# Wordnet

- Sets of synonyms
  - {bank, financial institution}
  - {bank, slope, riverside}
- Sets are connected through IS-A relationship
  - {robin, redbreast} IS-A
    - {bird} IS-A
      - {animal, animate\_being} IS-A
        - {organism, life\_form, living\_thing} IS-A
          - {entity}

games → game  
taken → take

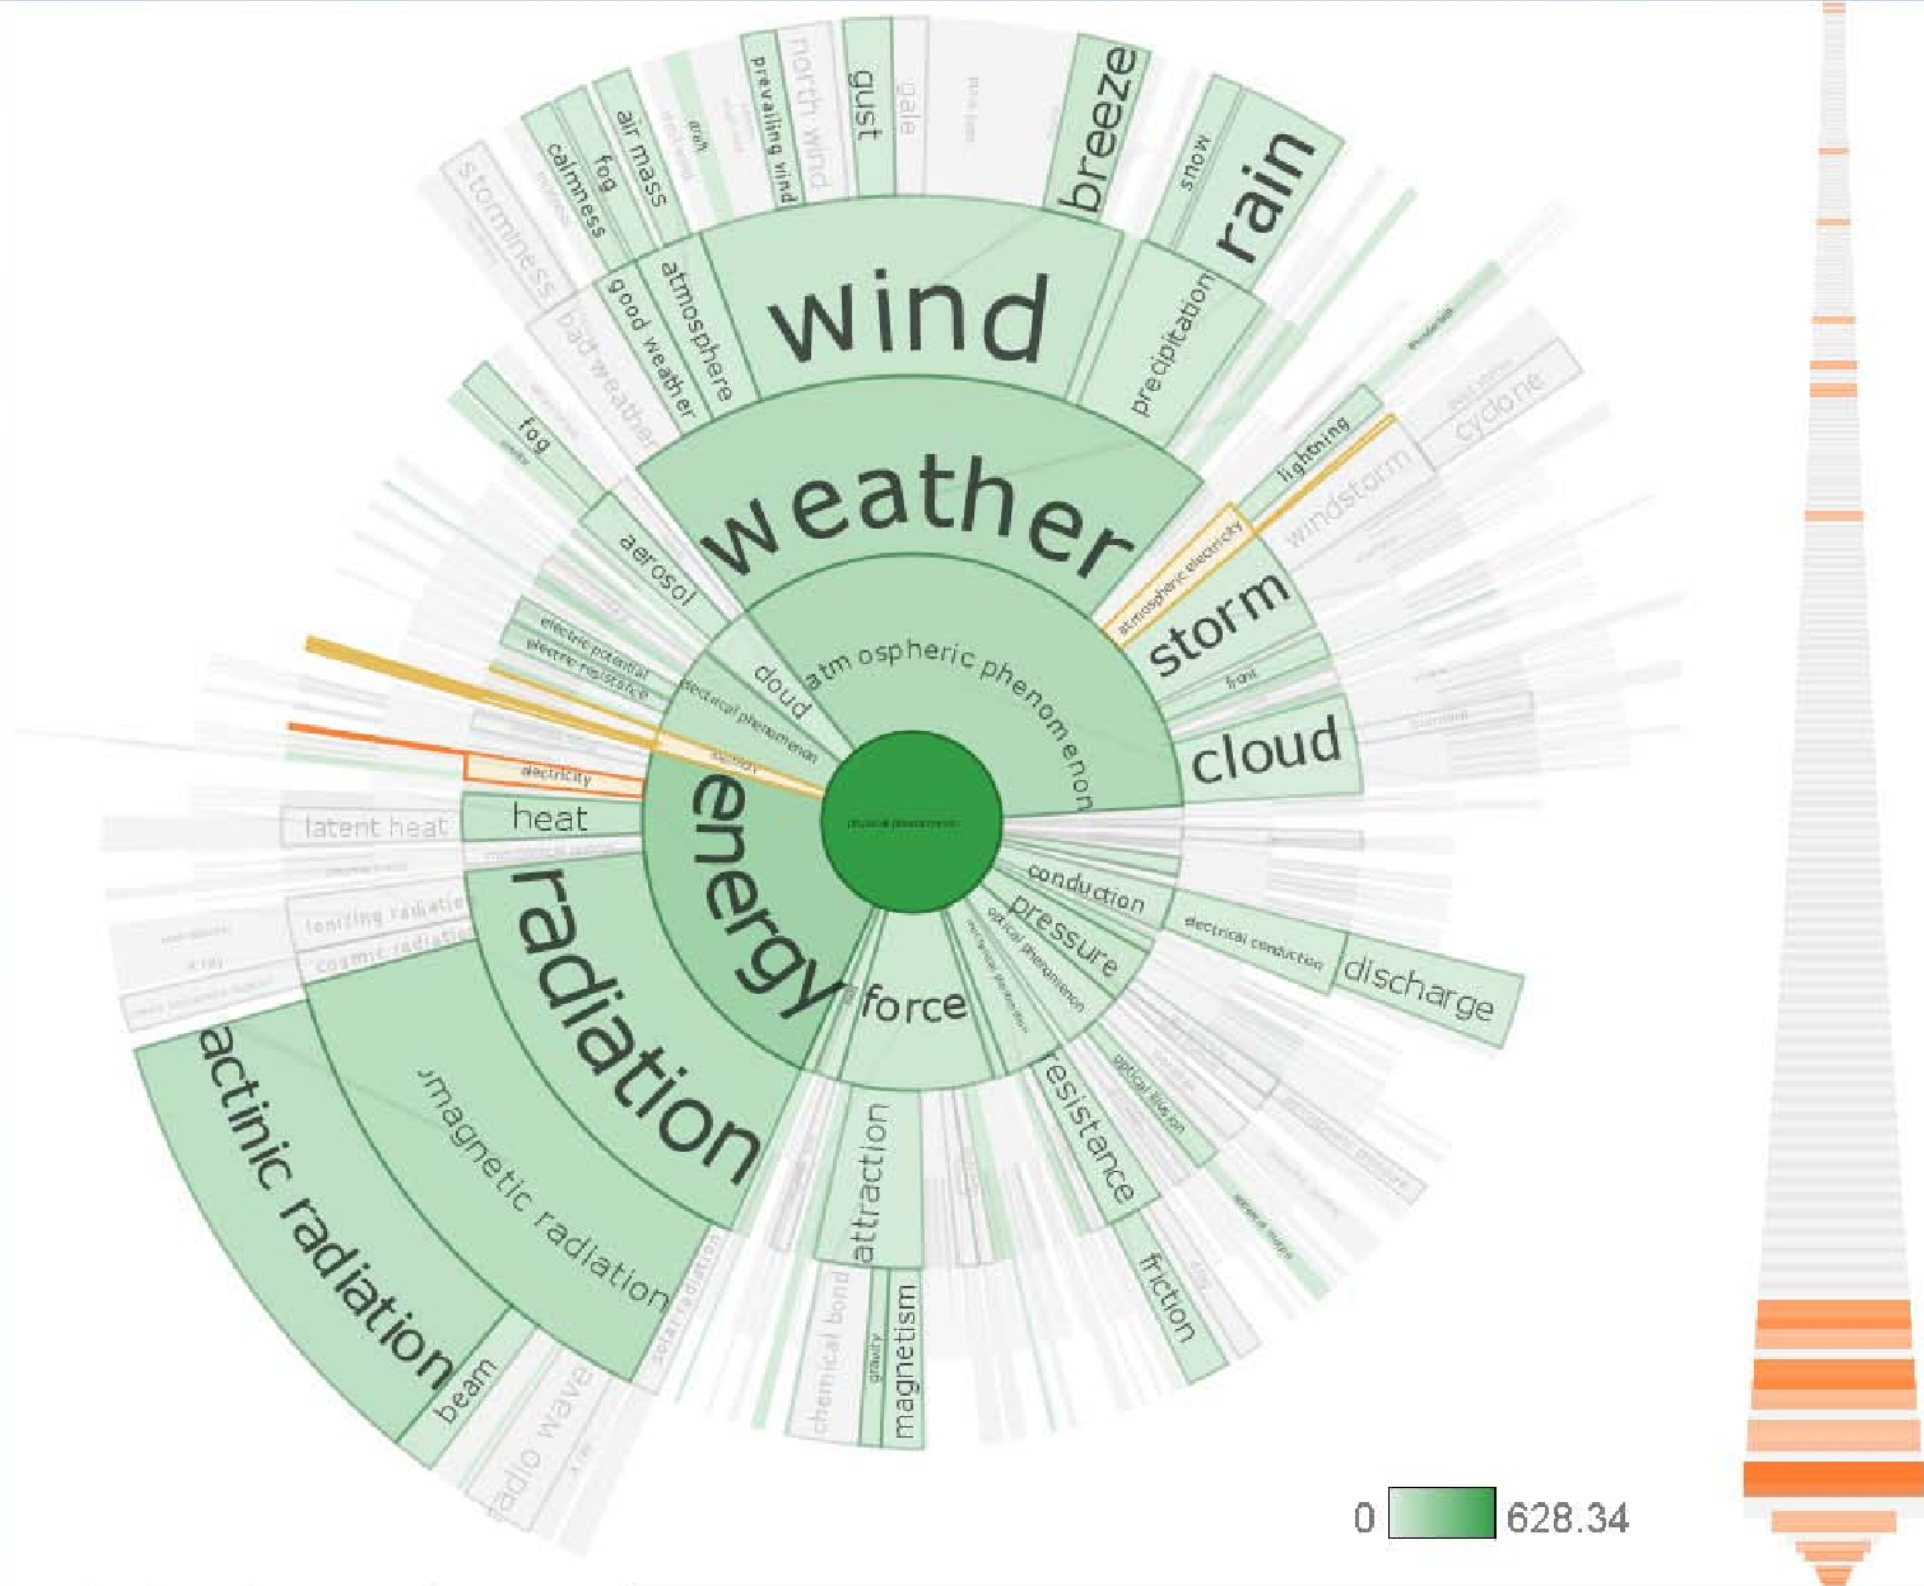

absolute,noun,10  
chair,noun,2  
moment,noun,11  
game,noun,30  
reality,noun,3  
take,verb,13  
represent,verb,17  
...

game IS activity  
chair IS furniture

# Docuburst

- Answers the question: 'What is this document about ?'
- Goal: to bring the exploratory experience of physical libraries to digital libraries
  - Idea of small multiples: library interfaces could be enhanced with arrays of Docuburst icons
- Drawbacks:
  - Higher cognitive load, as well as system load

# Conclusion

- Nominal, categorical variables
  - difficult to visualize
    - no inherent ordering
- Text
  - categorical nature +
  - high dimensionality
  - = challenging to visualize
