- ### Visualization defined & motivated
- computer-based visualization systems
 - provide visual representations of datasets
 - designed to help people carry out tasks more effectively.
 - suitable when
 - there is a need to augment human capabilities
 - rather than replace people with computational decision-making methods

- ### Nested model: Four levels of visualization design
- 
- domain situation
 - who are the target users?
 - abstraction
 - translate from specifics of domain to vocabulary of vis
 - what is shown? data abstraction
 - why is the user looking at it? task abstraction
 - idiom
 - how is it shown?
 - visual encoding idiom: how to draw
 - interaction idiom: how to manipulate
 - algorithm
 - efficient computation

- ### Why is validation difficult?
- different ways to get it wrong at each level
- 
- [A Nested Model of Visualization Design and Validation. Munzner. IEEE TVCG 15(6):921-928, 2009 (Proc. InfoVis 2009).]

- ### Evaluation: broadly interpreted
- methods from many fields, qualitative & quantitative
 - controlled experiments in lab, field studies of deployed systems
- 
- [A Nested Model of Visualization Design and Validation. Munzner. IEEE TVCG 15(6):921-928, 2009 (Proc. InfoVis 2009).]

- ### Problem-driven work
- design studies
 - in collaboration with target users
 - real data, real tasks
 - intensive requirements analysis
 - iterative refinement
 - deploy tools/systems
 - typical evaluation: field studies
 - pre-design & post-deployment, often qualitative
 - opportunistic collaboration
 - many domains, industry & academia

- ### Design studies: domains
- many domains
 - fisheries, in-car networks, journalism, ...
 - genomics
 - Harvard Med School, BC Cancer, UBC Biodiversity, Agilent, ...
 - log analysis
 - Google web search, AT&T web hosting, Mobify e-commerce
 - building & energy usage

Ocupado design study

Ocupado: Visualizing Location-Based Counts Over Time Across Buildings

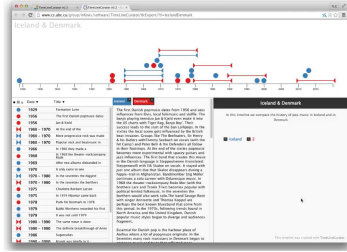

Michael Oppermann
 Tamara Munzner

<https://youtu.be/fKcwjV8eUdw>

- ### Technique-driven work
- scalable algorithms & systems
 - typical evaluation: computational benchmarks
 - new visual encoding & interaction techniques
 - typical evaluation: controlled experiments with people (quant)
 - typical evaluation: qualitative assessment
 - areas
 - graph drawing, dimensionality reduction
 - human-in-the-loop curation/assessment of ML results

https://youtu.be/l_f398EEswM

- ### Courses
- grad course CPSC 547: next offering Sep 2025
 - new-ish undergrad course: CPSC 447
 - (first three years was CPSC 436V)
 - current offering <https://www.students.cs.ubc.ca/~cs-447/23jan/>
 - current offering now (Sep 2023), then Jan 2025
 - 4th year majors course
 - theory: visualization foundations
 - tooling: D3.js
 - prereq: CPSC 310 (for JavaScript)
 - HCI not required, but very helpful

More info

- book (free through UBC library) <http://www.cs.ubc.ca/~tmm/vadbook>
- papers, videos, software, talks, courses <http://www.cs.ubc.ca/group/infovis> <http://www.cs.ubc.ca/~tmm>
