Abstract

Current research shows that building a supportive environment for women within the engineering community, where women can achieve personal and career satisfaction, will lead to an increase in the number of women attracted to engineering as a career, and reduce the number of women leaving the profession\(^1\). The Building Communities Symposium ’07 (BCS) was a two day event for 120 women in engineering in British Columbia from all levels of the profession; approximately 60 students, 20 new immigrant engineers/women returning to work and 20 established industry professionals were targeted to attend.

The vision of the Building Communities Symposium was to develop a network of women in engineering in BC, where students, new immigrant engineers, women returning to work and established industry professionals alike could have the opportunity to build and participate in a supportive and inclusive community. The number of women in engineering in any school or workplace in BC is so small that women often feel alone and isolated. This feeling of isolation tends to increase as women progress through their career and often leads to attrition\(^2\). The symposium aimed to address this issue and to strengthen the number of women in the field, by bringing women together to achieve a sense of “critical mass”.

The Building Communities Symposium programming was intentionally designed to provide a catalyst for network establishment of women across engineering workplaces, industries, and university faculties. Sessions held on the first day of the event focused on such topics as: a)
leadership skill development, b) mentoring relationships creation, c) outreach and advocacy work required to bring women into the profession, and d) the need to develop support networks that allow more women to advance to senior positions in their industries. On the second day of the symposium, participants self organized, planned, and developed action plans for their respective network, established through previous programming on the first day, via online websites.

In this paper, we report on the logistical planning, program design and implementation of this event, the results of the attendee survey, and make recommendations for future events of this nature. The authors hope that by reporting on their experiences’ outcomes that this will serve as a helpful guide to others who wish to take on a similar exciting and worthwhile challenge.

Index Terms – Women in Engineering, Networking, Symposium for women in engineering.

1 Planning the Event

The planning for the symposium started approximately 18 months before the event, through the writing of a proposal for seed funding from the Jade Bridges Program, sponsored by the NSERC Chair for Women in Science and Engineering, BC/Yukon. This seed funding, matched with funding from the student Work Study program at UBC, was used to fund a 4th year undergraduate student, supervised by a volunteer faculty member, to develop the event. Appendix A lists the committees that were established to implement various phases of the planning. Figure 1 shows a timeline for the planning of the event.

Figure 1: Planning Timeline

1.1 Early Phase Planning – Venue, Budget, and Awareness
One of the keys to this early phase of planning was the securing of an appropriate venue for the event. A second important step was the establishment of a set of three budgets for multiple funding scenarios for the event. One budget was based on what was felt to be a realistic amount of revenue, one included extras that would only be possible if the fundraising targets were exceeded, and one was a contingency budget based on receiving no sponsorship and relying solely on registration fees. These options provided some security to the planning committee that the event could be successfully implemented.

The third important step was to establish a combined advertising/awareness and fundraising strategy targeting agencies, organizations, and companies to support the event. Great care was taken in developing a clear message about what the event was about, and the value that would be provided to both the sponsors and the participants. A website was developed to support this effort. As much as possible, personal contacts were utilized to forward the fundraising requests to key decision makers at companies and agencies. This effort was well rewarded by a successful fundraising campaign supported by both industry and government agencies. Finally in the early stages of the planning, a survey of women in engineering at the undergraduate, graduate and industry stages of their career was conducted to identify desirable locations, time frames, programming content and personal goals for such a networking symposium. This survey had the consequence of building expectations for the event and helped to identify potential volunteers and participants.

1.2 Mid-phase Planning – Fundraising

In the second phase of the planning process, fundraising switched into high gear. A letter writing campaign with follow up contacts was implemented to attract funding. A smaller campaign was implemented to attract giveaway prizes (pens, keylights, etc) as well as door prizes for the event. At the same time, the program planning got underway based on survey information obtained in the first phase of the planning stages. Based on the strength of the fundraising campaign, the moderate level budget was adopted, with the plan to partially reimburse registration fees to volunteers if fundraising was more successful. The final budget is given in Appendix B. As it turned out, a large amount of the funding arrived after the event was implemented. These moneys were used to fund spinoff events from the symposium. Sponsors are listed in Appendix C.

1.3 Final phase Planning – Program planning and Logistics

In the final phase, detailed planning of the event and program was undertaken. This was a very intense time for the planning committee and program chair. At this stage, assistance with registration from the professional association group (DAWEG - The Division for the Advancement of Women in Engineering and Geoscience) was very much appreciated, and the countless hours of work by volunteers was invaluable. The online payment system allowed the committee to keep the handling of fees and cheques to a minimum and process the lump sum of attendee fees after the registration process.
The program planning started with brainstorming topics by grouped ideas into themes. Effort was made to select a variety of speakers, workshops and panelists to represent the diverse interests of women in engineering. The goal was to offer sessions that were sure to inform, energize and inspire the many wonderful women attending the symposium. The program overview and planning guide was designed to allow for "streamed" networking opportunities with and for women at all levels of their career path in engineering under the categories of:

- Leadership (L)
- Career Advancement (CA)
- Transition (TR)
- Work / Life Balance (WLB)

A condensed version of the program is shown in Appendix D.

In canvassing for speakers, the program planning coordinator relied on an establish network of women in industry and academia. As an interesting note, only one out of all selected speakers was male. And only two of the more than two dozen presenters, panelists and keynote speakers were paid for their sessions. The organizers offered to cover travel costs for these individuals and invited them to join the group for meals in those cases that they were only attending for part of the day.

2 Symposium Implementation

On September 15 and 16, 2007 approximately 120 women engineers, engineering students and faculty gathered at the Loon Lake Research and Education Centre in Maple Ridge, British Columbia to participate in the Building Communities Symposium. The registration data for the event is shown in Table 1 and includes volunteers and speakers.

![Symposium Group Photo](image)

Numerous volunteers were needed to implement this event. Overall, the program chair was able to draw from about 37 women that indicated willingness to assist with the planning of this event and about 10 of these women were involved with the crucial core implementations. It should be mentioned that not all volunteers were available throughout the duration of the 18 months planning and especially during the intense planning in the summer months leading up to the September event, the majority of volunteers were only sporadically available, which put an
additional burden on the planning committee to continue to recruit new volunteers to oversee
sections of the work.

The symposium had an information booth set up with two staff support volunteers from the
University of British Columbia, however, in hindsight, there could have easily been 3 or 4 full-
time help to relieve the volunteers from their stressful duties. Setup on the day of the event was
organized by 10 volunteers as well as 4 out-of-town early participants who spent the night before
the symposium at the Loon Lake Venue. The setup preparation was way into the night in order
to have all the rooms ready for the early arrival of the buses with the participants to start the
symposium at 9am.

Figure 3: Participants network in the Loon Lake Dining Hall

The event featured a number of keynotes speakers. On the first day, Anne Condon, NSERC/GM
Chair for Women in Science and Engineering opened the event with a discussion on the Art of
Networking, and Ms. Janet Benjamin, recently elected President of the Association of
Professional Engineers and Geoscientists of BC, closed the day with a directed and empowering
talk on marketing and engineering. On day two, Ann English, Director of the 2010 Olympic
Initiative at BC Hydro, gave a very compelling personal account of her career path and
management experience within several engineering companies, and Elizabeth Croft, Associate
Professor of Mechanical Engineering, UBC challenged the attendees to Believe, Calculate and
Succeed in their engineering endeavors and career paths.
Participants took part in a wide variety of breakout workshops and panel discussions designed to meet the needs of women engineering professionals at all stages of their career. The closing session of the symposium provided an engaging opportunity for further networking: new and established groups were formed and expanded around various communities including DAWEG (Division for the Advancement of Women in Engineering and Geoscience), Women in Engineering UBC, Women in Academia, Internationally Trained Engineers, GEERING Up! UBC Engineering & Science for Kids, etc. This activity provided a venue for these women to envision and plan community activities, with access to supporting funding from remaining funds of the Building Communities Symposium.

Figure 4: Speaker Sally Halliday listens while young women engineers navigate change

3 Outcomes

Building Communities was a resounding success, due to the hard work of the organizing committee as well as a large number of volunteers. An anonymous web survey was run the week following the event. Almost 50% (57) of the registrants responded to this survey (a very high voluntary response rate) and the results were overwhelmingly positive. In our post event survey, 98% of respondents felt that the event should be repeated, over 90% of respondents agreed that they had strengthened their engineering network, and almost 80% were more confident in their ability to succeed. Graphs of responses are compiled in Figure 5 below. Of the many anonymous comments received, the following statement is representative.

“This was a wonderful weekend. Having the opportunity to meet with women of all different backgrounds and places in their career helped me to feel less isolated in my own life. I appreciated that there were workshop options for both those in school and out of it.”
(a) Symposium led to better understanding of career goals.

(b) Symposium was well organized

(c) Participation lead to higher confidence.

(d) The symposium should be continued

(e) I strengthened my engineering network

(f) I will participate in more WIE activities

Figure 5. Post event survey outcomes.
4 Next steps

Due to the overwhelming success of the Building Communities Symposium, and the proof that more opportunities for networking and learning for women in engineering of all levels are needed, the symposium chair together with some planning committee members created a new group that will organize networking as well as professional development events for women in engineering in the Vancouver region - WIE (VR).

The aim of this initiative is to give women in engineering from various institutions and engineering industry in the Vancouver region the opportunity to come together, network, and share ideas through both fun events and professional development workshops.

The program is divided into two main categories: a) social networking and b) professional development. The social networking part of this initiative covers fun events which will include board game nights themed as educational and a fun way to network, potlucks, movie nights which will show documentaries of women in engineering or science who have become accomplished in both their careers and community activities or other documentary or educational topics of interest to the women in engineering community, and BBQs.

The plan is also to hold workshops and speaker sessions for the professional development category of programming. The workshop topics will range from project management, team building, leadership, motivation, conflict resolution, to career related topics. Further to this, previous anecdotal information tells us that many women are interested in holding seminars that are related to financial management. In order to cater to this interest, there will also be an investment workshop or workshops. The topics of the workshops could be real estate, early retirement, budgeting, and other such financial topics. Speakers from the engineering community or academia will also be invited to speak on such topics as entrepreneurship, technical expertise, and their experiences which will be of interest to the women. As part of the goals, the group tries to recruit female speakers and workshop facilitators as much as possible in order to promote the successes of women and to inspire the women engineering community.

These workshops and events will give an opportunity for leadership, networking, and mentorship activity for all participants and team building and organizational training for the committee members. Additional workshops to the ones listed above will be considered as the program develops.

5 Recommendations

After the event, valuable insight was gained into the planning of a first-ever grass roots event such as the Building Communities Symposium. As planning progressed, the organizing committee realized very quickly that planning this huge undertaking would have benefited from more staff support from other BC universities as well as industry or other organizations in order to not “burn out” its volunteers. Since this type of event had never been attempted on such a large scale in British Columbia before, and because women in engineering initiatives were lacking the exposure, support, and expertise at the university level as well as in industry, the organizing committee undertook an incredible risk in this initiative which, however, has paid off.
by establishing a solid reputation for any future event of this caliber. The goal is to gain institutional support at the major universities in the region. More specifically, the key to sustaining a program like BCS requires university support in the form of personnel and finances. We are happy to report that, by building upon the success of the Symposium, this support is slowly unfolding.

In addition, building a committed, responsible volunteer base is crucial for events of this type. Working mainly with initially untrained volunteers, much time was spent on training. Due to the short time frame of the final planning stages and the demographics of women’s work locations over the summer, the volunteers and chair often had only email as a means of training, which was very time consuming. Building a volunteer base in advance and providing training at earlier stages would have alleviated this problem. However, the training of these newly recruited volunteers paid off as many of them have now moved on to volunteering with new or established women in engineering committees and organizations.

In an ideal world, the organization for this enormous event would have begun earlier. However, it can be concluded, and backed up by the participant’s responses, that the symposium was well organized and that the planning went as smoothly as it could under the circumstances. Since the core organizing committee drew from key members who had previous experience in specific areas of planning, attention could be focused to areas that needed to be planned early and moved ahead quickly. It is recommended that the initial planning of events of this nature should start at least 12 – 18 months in advance. In addition, it is crucial to have the venue and core committee members established at a very early stage and ensure the core committee can commit time and energy for this long-term project.

Lastly, not enough can be said about staying optimistic, focused, and well supported both financially and emotionally with such a new ambition. The experience through this event has shown that, even though carefully crafting supporting and promotional materials, fundraising initiatives can sometimes take a long time, but by staying positive and persistent, funding may come through at a later date or even after the event has taken place.

The Organizing Committee would like to thank all volunteers, sponsors, British Columbia universities, and organizations for their support and trust, and would like to add that a well networked and mentored ‘women in engineering’ group, can and will put together such a successful event.

Biographical Information

Anja Lanz, an Engineering Physics student at UBC, chaired the Building Communities Symposium, spearheaded the creation of the first-ever female representative to the department of Engineering Physics, and is currently leading a new networking group of engineering women in the Vancouver region.

Elizabeth A. Croft received her B.A.Sc. in mechanical engineering in 1988 from the UBC, her M.A.Sc. from the University of Waterloo in 1992 and her Ph.D. from the University of Toronto in 1995. She is currently an Associate Professor and Assistant Head in Mechanical Engineering and her research interests include human-robot interaction, industrial robotics, and mechatronics.

Jennifer Pelletier is a past Director of GEERing Up! UBC Engineering & Science for Kids, and is currently the Advising, Recruitment and Undergraduate Program Assistant for UBC Mechanical Engineering, where she works to recruit, retain and support women in engineering.

Bernadette Currie (Mech UWO ’95, M.Eng UVIC ‘06) once worked in the consumer products industry for IBM and P&G in Ontario. For a decade she taught mechanical technology at BCIT and recently lectured at SFU. She is the chair of DAWEG and proud mother of three daughters.

Erin Biddlecombe (M.Ed, B.Sc) oversees the “Women in Engineering” program (a centralized program that works to recruit, retain, & support women engineering students at UBC), as part of her portfolio of Student Development Officer for UBC’s Faculty of Applied Science.

                              | • Ensure workshop materials being printed out ahead of time  
                              | • Circulate materials as needed  
                              | • Present speaker with thank you gift  |
| Accommodation Assistance      | • Assist participants with room location  
                              | • Act as contact person for any accommodation need  |
| Greeter/Floater              | • Greet participants  
                              | • Be available to assist either organizing committee or speakers during event.  |
| Set-up/Cleaning              | • Arrive early to set up venues and workshop areas  
                              | • Clean up during and after meals  
                              | • Clean up accommodation and workshop rooms after event, if needed  |
| First Aid                    | • Collect medical forms for participants (in sealed envelopes)  
                              | • Make first aid assistance available in case of emergencies  |
| Logistics                    | • Coordinate the efforts of event volunteers  
                              | • Maintain a central information booth  
                              | • Distribute schedules  
                              | • Coordinate materials and supplies  
                              | • Greet late arrivals  
                              | • Provide support and troubleshooting.  |
## Appendix B – Budget

### Revenue

**Registration**
- Students @ $35
- Back to work/Immigrant @ $45
- Industry @ $75

Subtotal: $2,420.00

**Grants**
- NSERC: $7,000.00
- JADE: $3,000.00

Subtotal: $10,000.00

**Sponsors**
- Industry Sponsorship: $13,100.00
- DAWEG - APEGBC: $1,500.00
- UBC Dept. of Mechanical Engineering: $1,500.00
- UBC Engineering Physics Program: $200.00
- UBC Applied Science Professional Fund: $1,000.00
- UBC Walter Gage Fund: $2,000.00
- SFU Faculty of Applied Science: $500.00
- Private Donor: $200.00

Subtotal: $20,000.00

**Total Revenue**
- All Sources: $32,420.00

### Expenses

**Accommodations and Meals**
- Friday Night Stayover for Volunteers: $540.00
- Overnight with meals - 100@ $68: $6,800.00
- Snack Catering: $1,000.00
- Food for stayover and extra snacks: $228.09

Subtotal: $8,868.09

**Facilities**
- AV costs: $- Equipment loaned by UBC Mechanical Engineering

**Travel**
- Ferry Costs: $202.35
- Bus Charter, return: $1,224.30

Subtotal: $1,224.30

**Administrative Expense**
- Stationary and printing: $75.00
- Web survey hosting: $62.30

Subtotal: $137.30

**Miscellaneous**
- $102.75

Subtotal: $240.55

**Advertising**
- Brochures and posters: $-
- Photocopying provided in-kind
- Ads: $500.00
- Website Hosting: $-

Subtotal: $500.00

**Speakers/Workshops**
- Presentation Fee: $482.21
- Speaker Gifts: $160.19
- General logistics supplies: $41.42
- Workshop Materials and Programs: $540.67
- Tote Bags: $796.68

Subtotal: $1,931.17

**Coordinator Funding**
- Sept 06-Sept 07: $6,800.00

**Volunteer Reimbursements**
- $430.00

**Spinoff Activities**
- $5,971.39

**Carry-over Funding**
- To fund coordinator for next Symposium: $6,800.00

**Total Expenses**
- $32,420.00

**Revenue - Expenses**
- $0.00
