- Cable or usb disc to move the video footage to the lab computers
- 1-2 pairs of headphones
- **Optional:** an external storage device
- **Optional:** music (mp3s, WAV, etc), for use in your edited video or voice over.

- At the end of the lab, each group must hand in their completed video. This is an unmarked deliverable..

## Tentative Schedule:

---

- Video importing (~10 min)
  - The TA will provide instruction on how to import your video and other materials in Adobe Premier.
  - ■ You will use the footage for your project to produce a 1-minute video during the tutorial.
  - ■ **IMPORTANT** Because your own file space is limited, you should import the video to your machine's hard drive. The c:/temp folder should be writable. Alternatively, use an external storage device.

- Video Editing
  - The TA will give a short demonstration on how to edit video in Adobe Premier (~15 min)
  - Editing: create the video you designed in the brainstorming phase (~20 min)
  - Exporting: output the video; use a low internet quality (e.g. AVI) (~5 min)
- Playback of videos (~15 min)
  - each team will swap their video with another team
  - fill out evaluation sheets for the video you see
- Return evaluation sheets to the appropriate group before leaving the tutorial
