Thanks for filling out this survey – it will help me improve future versions of courses I teach. I do not read these until after I get back the official ones, long after grades are out.

To return this evaluation anonymously later, even if you weren’t in class on the last day, ask the front desk receptionist on the ICICS/CS second floor to put it in my mailbox (enclosed in an envelope).

number of hours I spent on

assignment 1: 2: 3 (so far):

studying for midterm 1: midterm 2: final (so far):

required readings: other course-related stuff:

experience with programming before this course

none some lots

for the number of midterms, I

prefer two midterms, early and late prefer just one midterm, in the middle

this course

is worse than I expected is about what I expected is better than I expected

the content of this course is

too introductory just right too advanced

lectures are

too slow just right too fast

in attending the lectures, I

learn almost nothing learn some learn a lot

the lecture slides in this course are

not at all useful ok very useful

the grading in this course is

unfair fair

in doing the reading for this course, I

learn almost nothing learn some learn a lot

in doing the programming projects for this course, I

learn almost nothing learn some learn a lot

are the programming projects

too easy just right too hard

in doing the labs for this course, I

learn almost nothing learn some learn a lot

are the exams

too easy just right too hard

is the total workload

less than most other courses about the same more than most other courses

I attend labs

never sometimes always

I attend tutorials

never sometimes always
my interactions with TA Young Han were
not at all useful somewhat useful very useful didn’t interact

my interactions with TA Maria Piao were
not at all useful somewhat useful very useful didn’t interact

my interactions with TA Alex Totolici were
not at all useful somewhat useful very useful didn’t interact

my interactions with TA Pooya Esfandiar were
not at all useful somewhat useful very useful didn’t interact

my interactions with TA Anseok Joo were
not at all useful somewhat useful very useful didn’t interact

my interactions with TA Kuljeet Singh were
not at all useful somewhat useful very useful didn’t interact

my interactions with TA Primal Wijesekera were
not at all useful somewhat useful very useful didn’t interact

are instructor Tamara Munzner’s office hours
not at all useful somewhat useful very useful didn’t attend

are the discussion groups posts from instructor, TAs, and other students
not at all useful somewhat useful very useful don’t read group

response time for email/newsgroup from instructor and the TAs
much less than usual in other courses about the same much more than usual

is the instructor doing coding as part of lecture
very useful somewhat useful not useful

is trying out coding by myself on paper during lectures
very useful somewhat useful not useful

I practice coding outside of class in addition to required assignments and labs
often sometimes never

the delay on seeing my marks for projects/assignments/midterms is
much less than usual in other courses about the same much more than usual

I would recommend this course to a friend
yes no
