

Thanks for filling out this survey - it will help me improve the future versions of this course. To return this evaluation anonymously later, ask the front desk receptionist at the CICS second floor to put it in my mailbox.

number of hours I spent on

programming projects 1: 2: 3: 4:

written assignment 1: 2: 3:

studying for midterm 1: final:

required readings: other course-related stuff:

experience in C++ before course:

none some lots

experience with graphics programming before this course

none some lots

opinion on face-to-face project grading

worse than standard grading

no opinion / the same

better than standard grading

Same questions as midterm evaluation

this course

is worse than I expected is about what I expected is better than I expected

the content of this course is

too introductory just right too advanced

lectures are

too slow just right too fast

in attending the lectures, I

learn almost nothing learn some learn a lot

the lecture slides in this course are

not at all useful ok very useful

the grading in this course is

unfair fair

in doing the programming projects for this course, I

learn almost nothing learn some learn a lot

are the programming projects

too easy just right too hard

in doing the written assignments for this course, I

learn almost nothing learn some learn a lot

are the written assignments
too easy just right too hard

is the total workload
less than most other courses about the same more than most other courses

I attend labs
never sometimes always

are TA Warren Cheung's lab hours
not at all useful somewhat useful very useful didn't attend

are TA Greg Kempe's lab hours
not at all useful somewhat useful very useful didn't attend

are Dr. Munzner's office hours in the lab
not at all useful somewhat useful very useful didn't attend

are Dr. Munzner's newsgroup posts
not at all useful somewhat useful very useful don't read newsgroup

are the demos shown during lectures
very useful somewhat useful not useful

I experiment with the demos outside of class
often sometimes never

the delay on seeing my marks for projects/assignments/midterms is
much less than usual in other courses about the same much more than usual

I would recommend this course to a friend
yes no
