

Custom Evaluation for CPSC 533C: InfoVis
Professor Tamara Munzner, Term 1 2009-2010

New this year - official evaluations are online. Please do also fill them out!

Thanks for filling out this evaluation, it will help me improve the course in years to come! You can return this to my mailbox if you don't have time to finish it in class or missed that class - but please put it in an envelope since I don't read these until I have submitted all grades.

number of hours spent per week for the
first seven weeks on readings+questions: _____

number of hours spent on presentation preparation: _____

this course

exceeded my expectations met my expectations fell below my expectations

would you recommend this course to another grad student?

highly recommend it maybe recommend it definitely not recommend it

the content of this course was

too introductory just right too advanced

were lectures

too fast just right too slow

in attending Prof Munzner's lectures, I

learned a lot learned some learned very little

Prof Munzner's lecture slides in this course were

very useful ok nearly useless

guest lecture from Bruckner (scivis) was

very useful ok nearly useless

guest lecture from Andrews (text) was

very useful ok nearly useless

in doing the reading for this course, I

learned a lot learned some learned very little

in writing questions about the reading for this course, I

thought a lot thought some thought very little

in doing the presentation for this course, I

learned a lot learned some learned very little

in doing the project for this course, I

learned a lot learned some learned very little

for the most part, attending my classmate's presentations was

was very worthwhile was somewhat useful was a waste of my time

was the total workload

more than most other courses about the same less than most

was meeting with Prof Munzner individually

very useful somewhat useful not useful

were the videos/demos shown during lectures

very useful somewhat useful not useful

the feedback/grading I got from the professor was

very helpful somewhat helpful not at all helpful

the delay on seeing my grades

much less than usual in other courses about the same much more than usual

the following topics were covered in lectures:

intro, design studies, fundamentals, perception/memory, color,
statistical graphics, multiples/interaction, space/layers,
navigation/zooming, high dimensionality, graphs/trees,
user studies, text, scivis, process/papers

which lectures were

best?

worst?

what did you like best about CS533?

what did you like least about CS533?

how would you like to see CS533 changed next time?

please add any additional comments on CS533
