

Interaction

Lecture 11 CPSC 533C, Fall 2004

25 Oct 2004

Tamara Munzner

- Ware: Interacting with Visualizations
- Ware: Thinking with Visualizations
- Cognitive Co-Processor
- SDM
- Dynamic Queries
- more linked views
 - Exploratory Data Views
 - Influence Explorer

Ware Interaction

- control loops
 - Fitts' Law
 - time to select depends on distance, target size
 - two-handed interaction
 - coarse vs. fine control: paper vs. pen hold
- learning
 - power law of practice
- vigilance
 - difficult, erodes with fatigue

Ware Interaction 2

- navigation
 - next time
- rapid zooming
 - next time
- distortion
 - next week
- multiple windows, linked highlighting
 - today!
- dynamic queries
 - today!

Ware Thinking with Viz

- problem solving loops
 - external representations
- visual working memory
 - low capacity
 - visual attention
 - gist: 100ms
 - change blindness
 - “world is its own memory”

Memory and Loops

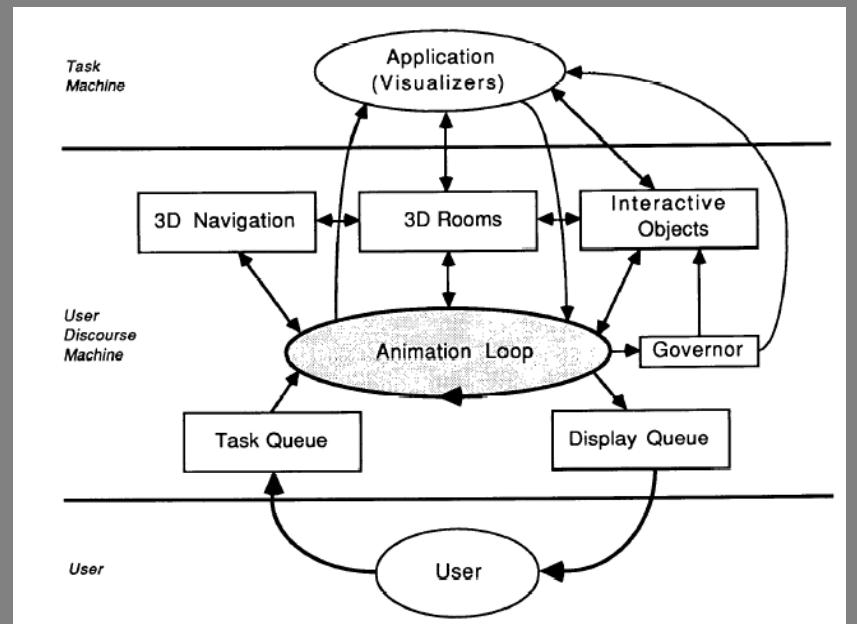

- long term memory
 - chunking
 - memory palaces (method of loci)
- loops
 - problem-solving strategy
 - visual query construction
 - pattern-finding loop
 - eye movement control loop
 - intrasaccadic image-scanning loop

InfoVis Implications

- visual query patterns
- navigation cost
- multiple windows vs. zoom

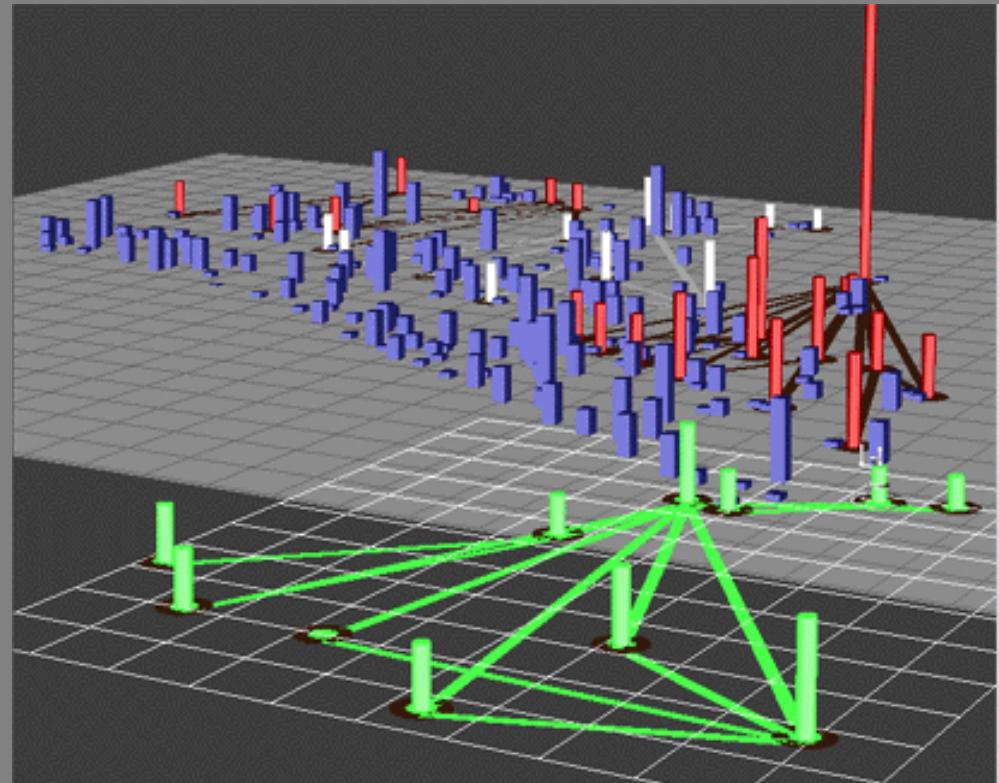

Cognitive Co-Processor

- animated transitions
 - object constancy
 - fixed frame rate required
- architectural solution
 - split work into small chunks
 - animation vs. idle states
 - governor controls frame rate
- [video: 3D rooms]

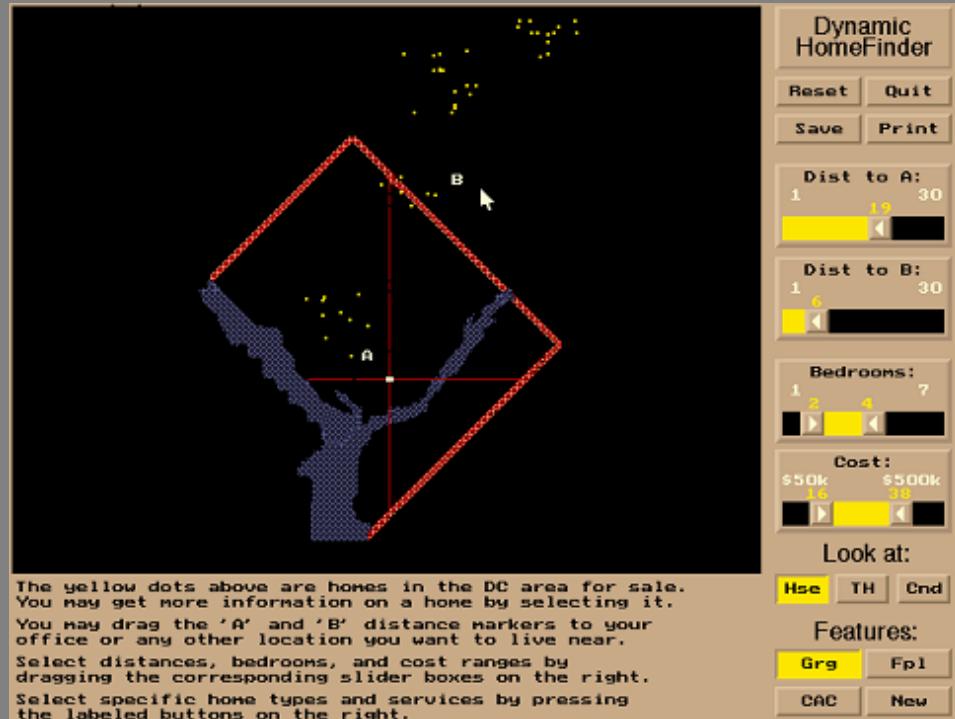

SDM

- sophisticated selection, highlighting,
- object manipulation
- [video]

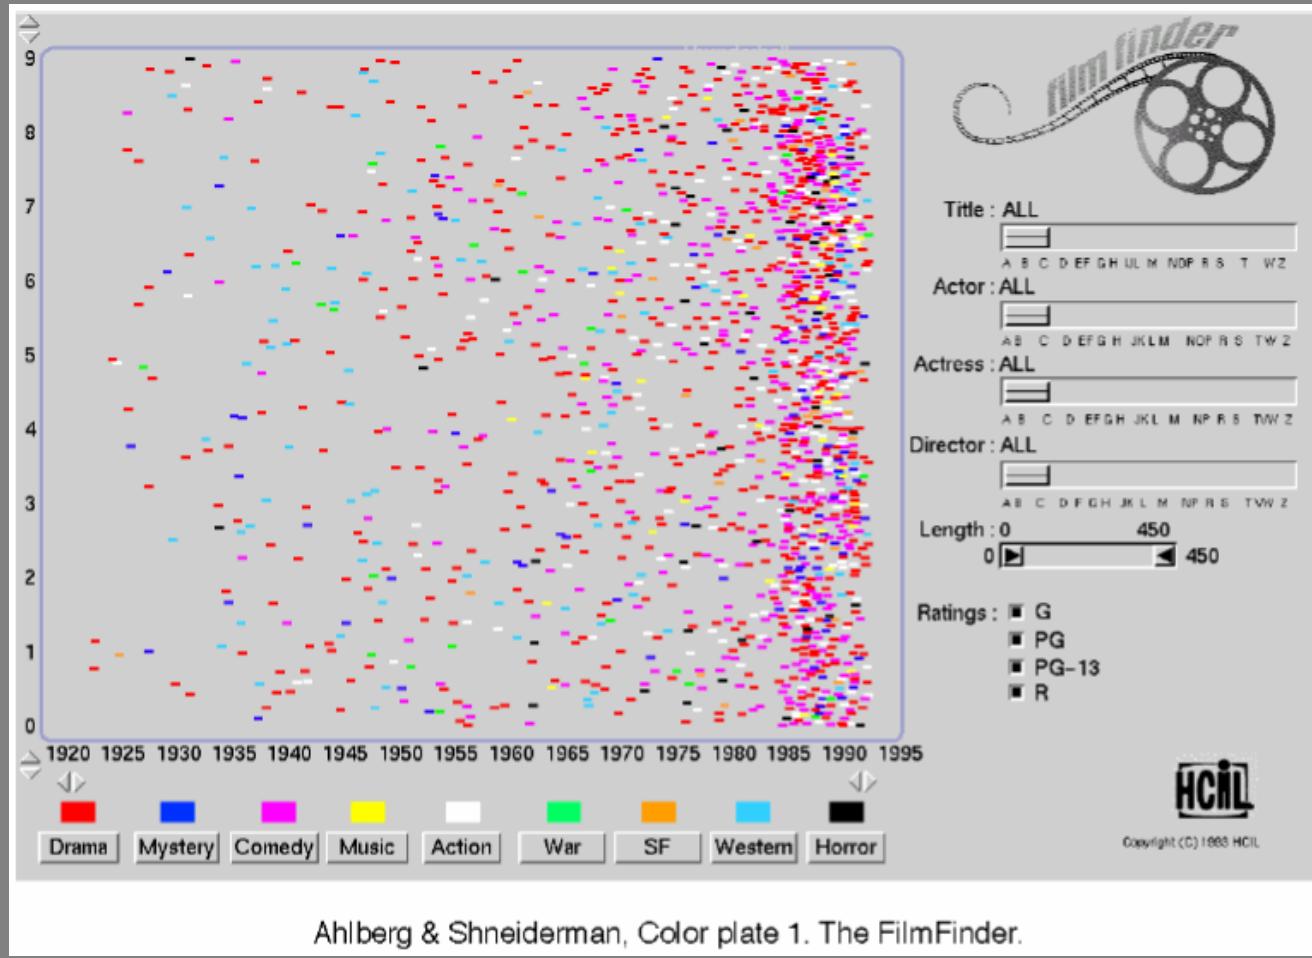

Dynamic Queries: HomeFinder

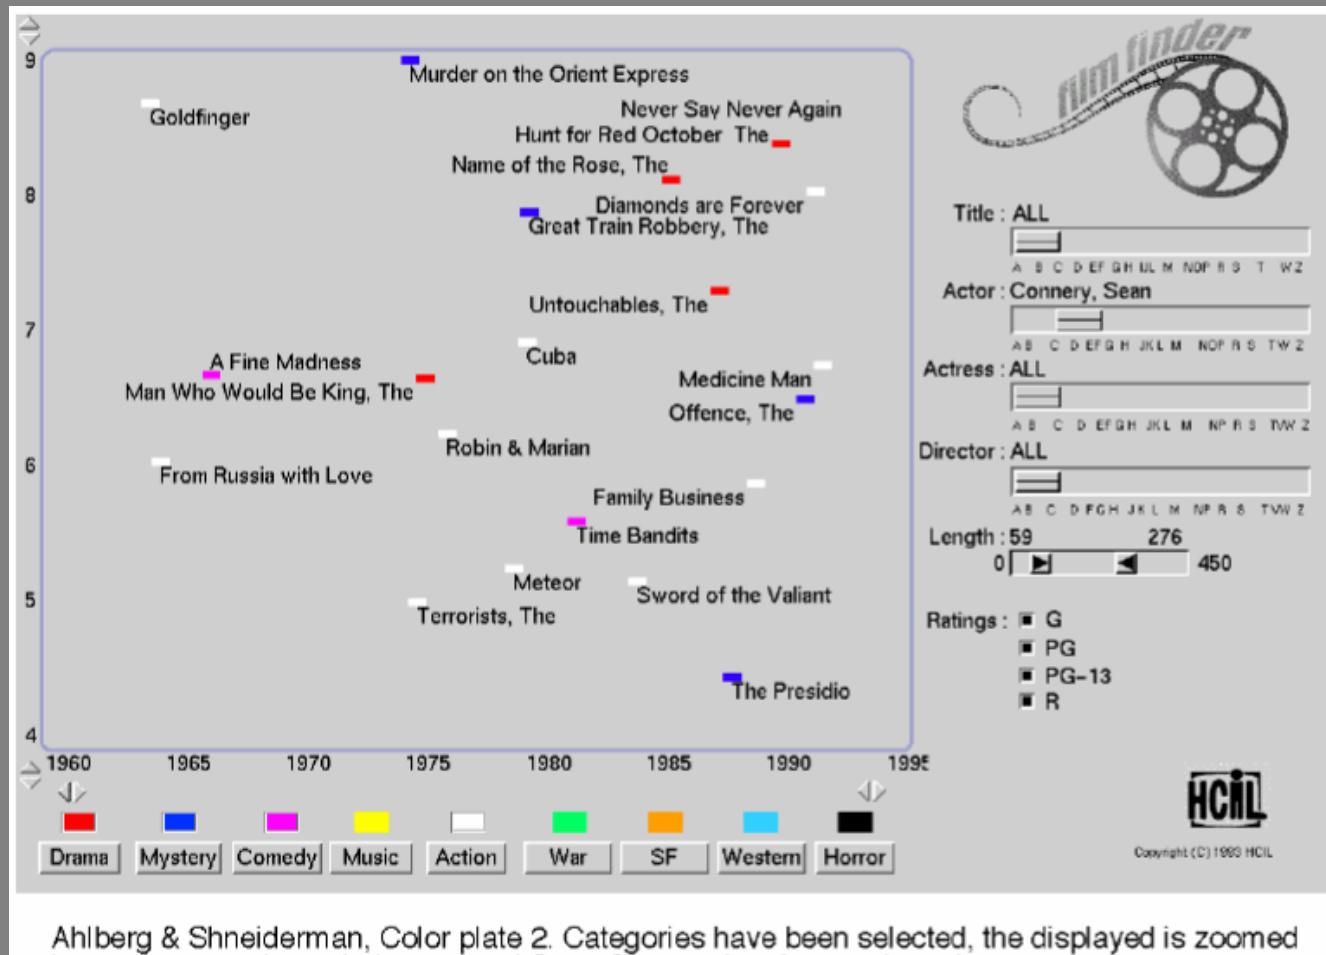

- filter with immediate visual feedback
- “starfield”: scatterplot
- [video]

DQ 2: FilmFinder

DQ 2: FilmFinder

More Linked Views

key infovis interaction principle

so far: Ware, Trellis, cluster calendar, snap-together,

brushing: linked highlighting

Becker and Cleveland, “Brushing Scatterplots”,
Technometrics 29, 127-142

Exploratory Data Visualizer

Graham J. Wills. Visual Exploration of Large Structured Datasets. In *New Techniques and Trends in Statistics*, 237-246. IOS Press, 1995.

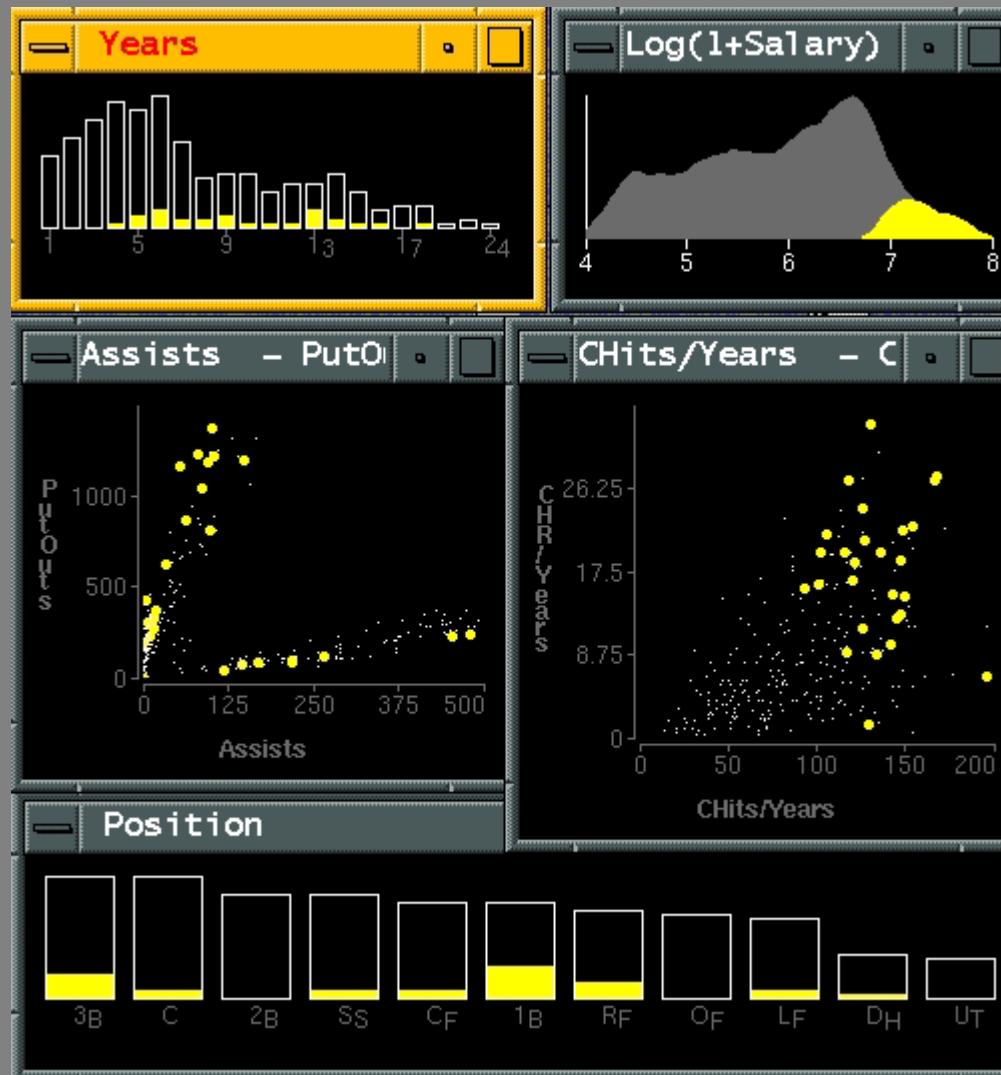

Highlighting (Focusing)

Focus user attention on a subset of the data within one graph (from Wills 95)

Link different types of graphs: Scatterplots and histograms and bars

(from Wills 95)

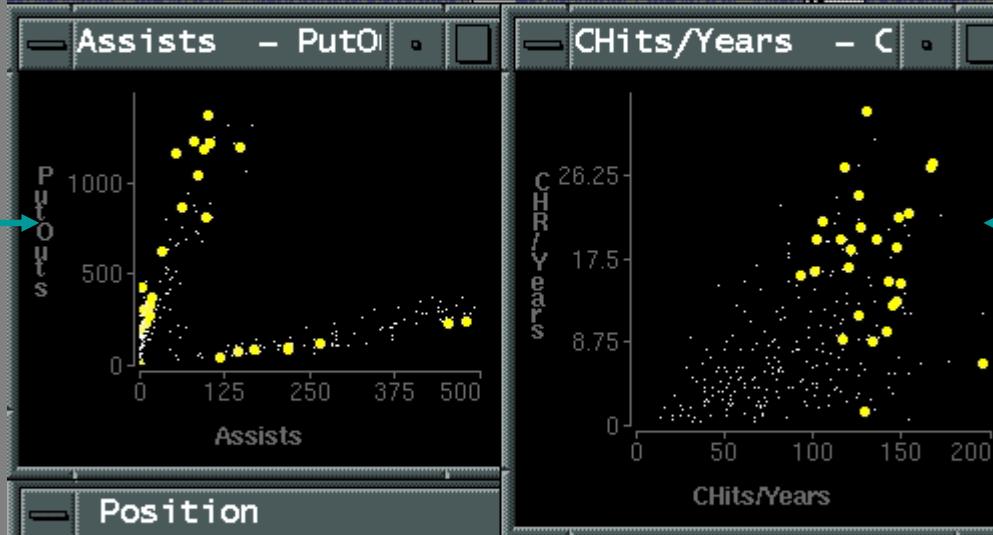

Baseball data: Scatterplots and histograms and bars (from Wills 95)

how long
in majors

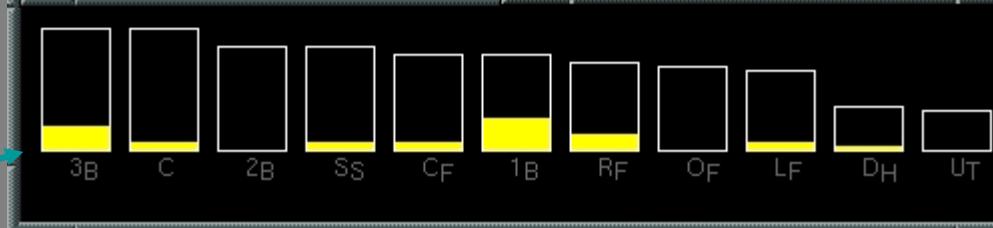

select high
salaries

avg assists vs
avg putouts
(fielding ability)

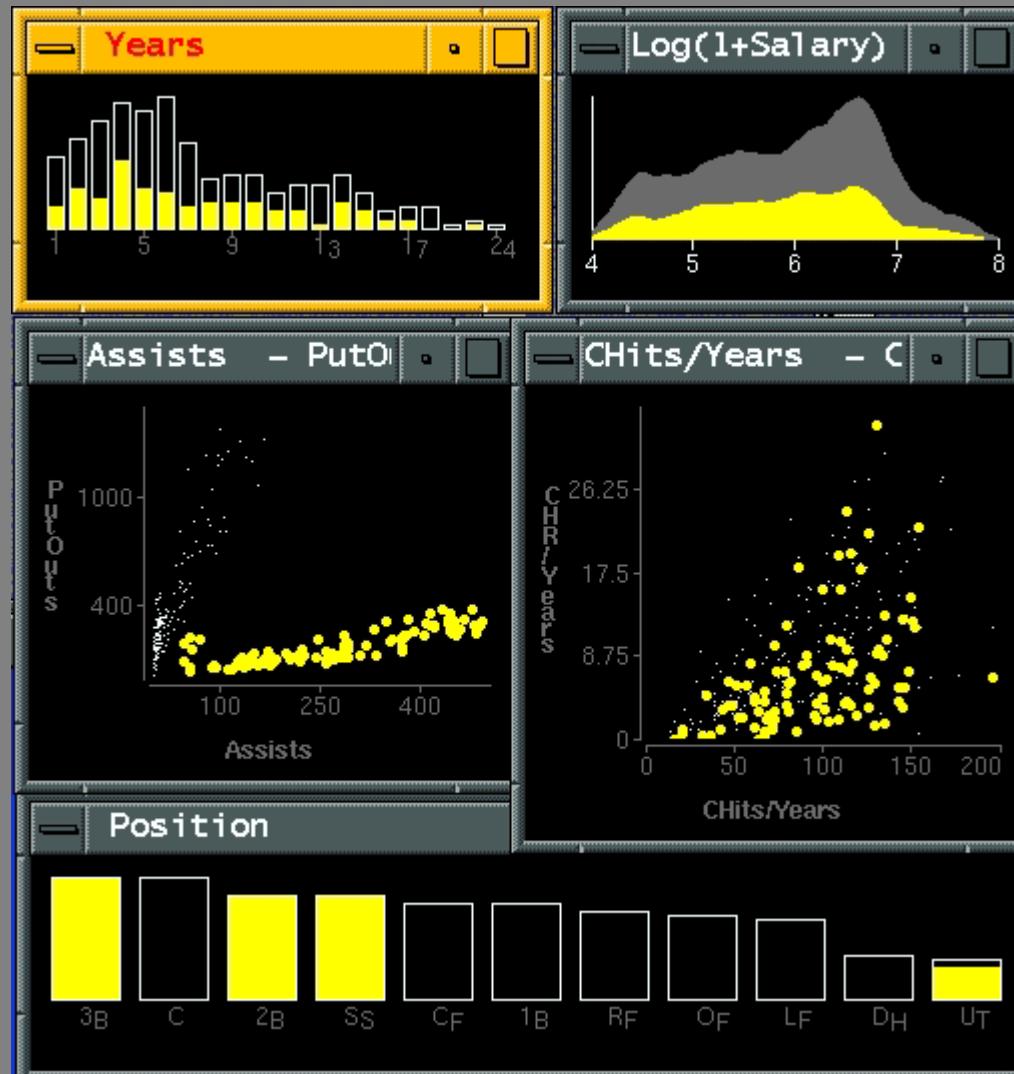

avg career
HRs vs avg
career hits
(batting ability)

distribution
of positions
played

Linking types of assist behavior to position played (from Wills 95)

Influence/Attribute Explorer
