

Intelligent Systems (AI-2)

Computer Science CPSC422, Lecture 1

Sept 4, 2019

People

Instructor

- **Giuseppe Carenini** (carenini@cs.ubc.ca; office ICCS 105)

Natural Language Processing, Summarization, Discourse Parsing, Preference Elicitation, Explanation, Adaptive Visualization, Intelligent Interfaces.....

Office hour: my office, TBD

Teaching Assistants (office hours TBD)

Grigorii Guz

g.guz@alumni.ubc.ca

Daniele Reda

dreda@cs.ubc.ca

Matthew Wilson

matwilso@cs.ubc.ca

Course Essentials(1)

- **Course website:**

www.cs.ubc.ca/~carenini/TEACHING/CPSC422-19/index.html

- This is where most information about the course will be posted, most handouts (e.g., slides) will be distributed, etc.
- **CHECK IT OFTEN!** (draft already available on Canvas)

- **Lectures:**

- Cover basic notions and concepts known to be hard
- I will try to **post the slides in advance** (by 3:30).
- After class, I will post the same **slides inked** with the notes I have added in class.
- Each lecture will end with a set of **learning goals**:

Student can....

Course Essentials(2)

Textbook: Selected Chapters from

- **Artificial Intelligence**, 2nd Edition, by Poole, Mackworth. <http://people.cs.ubc.ca/~poole/aibook/>

Reference (if you want to buy a book in AI this is the one!)

- **Artificial Intelligence: A Modern Approach**, 3rd edition, by Russell and Norvig [[book webpage on course webpage](#)]

More readings on course webpage.....

Course Essentials(3)

- **Canvas** : discussion board
 - Use the **discussion board** for questions about assignments, material covered in lecture, etc. That way others can learn from your questions and comments!
 - Use **email** for private questions (e.g., grade inquiries or health problems).
- **Canvas** : assignments, grades, **iClicker registration**
- **Aispace** : online tools for learning Artificial Intelligence <http://aispace.org/>
 - Under development here at UBC!
 - Already used in cpsc322

Course Elements

- **Practice Exercises:** 0%
- **Assignments:** 15%
- *Research Paper Questions & Summaries* 10%
- **Midterm:** 30%
- **Final:** 45%
- **Review Exam:** 1% bonus
- **Clickers** 3% bonus (1% participation + 2% correct answers)

If your final exam grade is \geq 20% higher than your midterm grade:

- Midterm: 15% ↓
- Final: 60% ↑

Assignments

- **There will be four assignments in total**
 - They will not necessarily be weighted equally
 - They will be submitted using **Canvas (as single pdf file)**
 - Only the **most recent** submissions will be graded
- **Group work (same as 322)**
 - you **can** work with a partner (and get a small **bonus !**)
 - ✓ Each partnership hands in a **joint** assignment submission with both students' names/IDs
 - you may **discuss** questions with other students
 - you may **not look at or copy** each other's written work
 - additional details on the course website

Assignments: Late Days (same as 322)

- **Hand in before class on due day** (on Canvas)
- **You get four late days** 😊
 - to allow you the flexibility to manage unexpected issues
 - additional late days will **not** be granted except under truly exceptional circumstances
- **A day is defined as:** all or part of a 24-hour block of time beginning at the start of the class on the day an assignment is due
- Applicable to assignments only (**not midterm or final**)
- if you've used up all your late days (or don't claim them), **you lose 20% per day**
- **Assignments will not be accepted more than four days late**

Missing Assignments / Midterm / Final

Hopefully late days will cover almost all the reasons you'll be late in submitting assignments.

- However, something more serious like an extended illness may occur 😞
- **For all such cases:** you'll need to **provide a note** from your doctor, psychiatrist, academic advisor, etc.
- **If you miss:**
 - **an assignment**, your score will be reweighted to exclude that assignment
 - **the midterm**, those grades will be shifted to the final.
 - **the final**, you'll have to write a make-up final as soon as possible.

Paper Readings

- We will read and discuss 3 (fairly recent) **research papers** this term
- You will be required to submit **summaries** of the papers along with **questions** about them
- The goal is to give you practice in reading research papers with a **critical eye**
 - Note possible **weaknesses** in the research or alternative approaches that might be better
 - Connect the **concepts** from the lectures to real-world research
 - What would be the **next step**?
- **Late days cannot be claimed for paper readings!**

How to Get Help?

- Use the course **discussion board** for questions on course material (so keep reading from it !)
 - *Please check for similar questions before posting*
- If you answer a challenging question you may get **bonus points!** 😊
- Go to **office hours**
 - times will be finalized by next week
- Can schedule by appointment if you can document a serious conflict with the official office hours (or if other considerations apply)

Getting Help from Other Students? From the Web? (Plagiarism)

- It is **OK** to talk with your classmates about assignments; learning from each other is good
- **But you must:**
 - **Not copy** from others (with or without their consent)
 - Write/present your work **completely on your own** (code questions exception)
- **If you use external source (Web, other students, etc.)** in the assignments. **Put material in quotes and cite source!**
e.g., ***“bla bla bla.....”*** [wikipedia]

Getting Help from Other Sources? (Plagiarism)

When you are in doubt whether the line is crossed:

- Talk to me or the TA's
- See **UBC official regulations** on what constitutes plagiarism (pointer in course Web-page)
- Ignorance of the rules will not be a sufficient excuse for breaking them

Any unjustified cases will be **severely dealt with by the Dean's Office** (that's the official procedure)

- My advice: better to skip an assignment than to have “**academic misconduct**” recorded on your transcript and additional penalties as serious as expulsion from the university!

Clickers - Cheating

- **Using another person's clicker**
- **Having someone use your clicker**

is considered **cheating** with the same policies applying as would be the case for turning in illicit written work.

To Summarize

- All the course logistics are described in the course Webpage

www.cs.ubc.ca/~carenini/TEACHING/CPSC422-19/index.html

Or WebSearch: Giuseppe Carenini

(And summarized in these slides)

- Make sure you carefully read and understand them!

Your UBC-AI Background

I took 322 within the last 12 months

A. yes

B. no

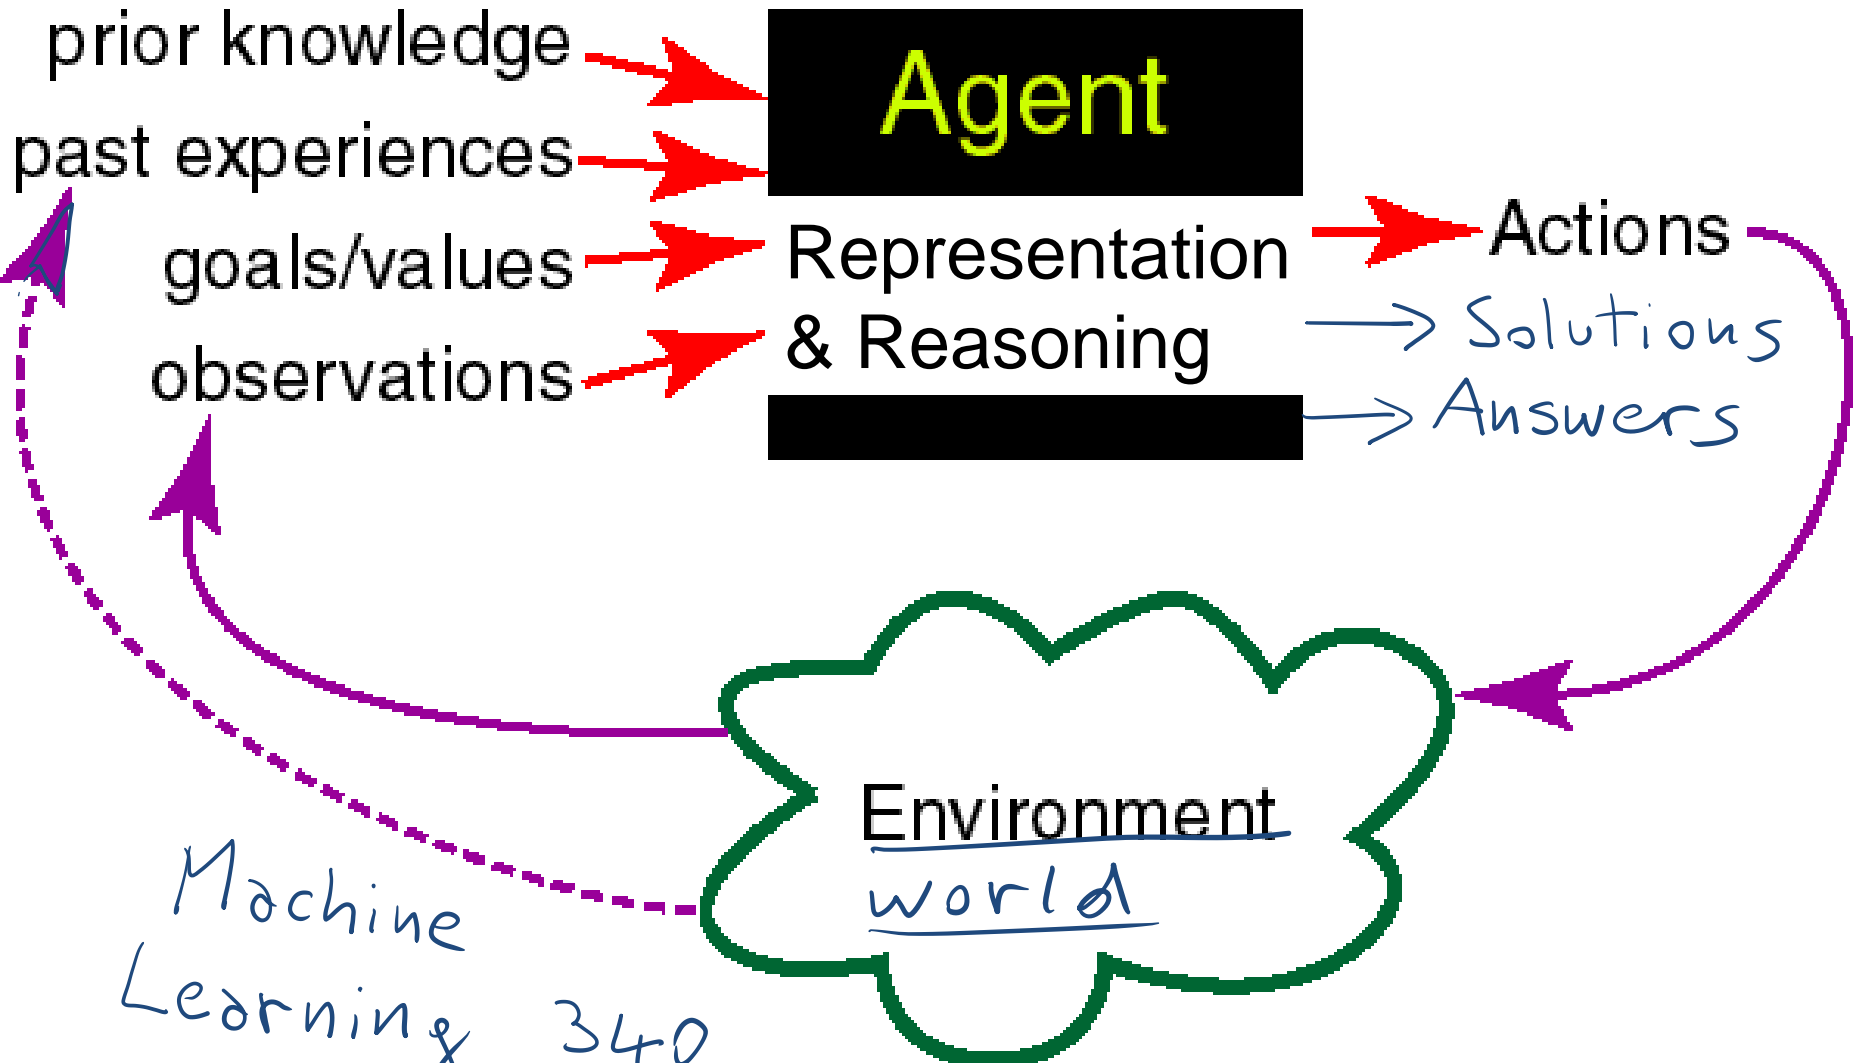

I took Machine Learning (340) previously

A. yes

B. no

“How is this this course compared to 322?”

- More challenging material (obviously)
- More **mathematical**
 - Lots of probabilistic operations (i.e. sums of products)
 - Important to be able to look at an expression and be able to figure out “what’s going on”
- More **programming**
 - Most (if not all) assignments will have a programming component to them
 - Usually you may use the language(s) of your choice

Core Values in 322

- **Conceptual understanding** over **Memorization**
- Sometimes things will be left **underspecified**
 - Eg. I may ask you to solve a problem without telling you the precise steps to follow or what formats to use
 - This is usually **intentional**
- Best answers are:
 - **Correct**
 - **Easy to read**
 - As **short** as possible while including **important** information

CPSC 322 Review “Exam”

<https://forms.gle/SpQwrXfonTZrVf4P7>

Based on CPSC 322 material

- Logic
- Uncertainty
- Decision Theory

Review material (e.g., 322 slides from 2017):

<https://www.cs.ubc.ca/~carenini/TEACHING/CPSC322-17S/index.html>

TODO

- **Review CPSC 322 material**
- **Read textbook 9.4**
- **Read textbook 9.5**
 - **9.5.1 Value of a Policy**
