Course Description

• We’ll explore the interplay between information technology and society, emphasizing ethical issues.

• You’ll come away with an increased:
  – understanding of the social and ethical implications of computer use and abuse;
  – ability to think critically and defend decisions logically;
  – appreciation for alternate points of view.

• Our focus will be on reading, writing and discussion.
  – Each week students will complete an assigned reading, write a mini-essay in response, and evaluate the work of others.
  – Classes will emphasize discussion and debate.
  – The ability to speak, read and write fluently in English is essential for success in the class.

Course Website: http://cs.ubc.ca/~kevinlb/teaching/cs430
Grading Scheme

In-Class Participation 20 %
Weekly Essay Questions 25 %
Weekly Peer Review 10 %
Midterm Exam 15 %
Final Exam 30 %

Caveats:
• To pass the course, you must pass the final exam.
• I may change the exact percentage breakdowns shown here.
• This is not an easy course—something to hand in every class
  — On the other hand, you’ll learn a lot, and students who work hard throughout the term can expect to do well.

Course Website: http://cs.ubc.ca/~kevinlb/teaching/cs430
Participation

• **Clicker use**: 10%
  – depends on activity, not on answers
  – starts **Tuesday**
  – if you don’t register in **Connect**, you’ll start missing marks
  – posted weekly

• **Other class participation**: 10%
  – structured activities (debates, presentations)
  – participation in class discussions
  – course blog (Google+) discussion and contribution
  – making good use of time in class (Facebook, games, ...)
  – tracked by TAs, finalized only at end of class
Weekly Essays

• **Between Thursday, 3:30 PM and Tuesday, 1:30 PM** *(sharp!)*
  – Do **assigned readings** of up to one chapter from the textbook. Readings posted at [http://cs.ubc.ca/~kevinlb/teaching/cs430](http://cs.ubc.ca/~kevinlb/teaching/cs430).
  – Take a **multiple-choice quiz** online to test your comprehension.
  – Answer one **essay question** *(your choice from a list of choices)* and enter your answers online. You'll be allowed up to 300 words; that's less than one single-spaced page.
  – First weeks: do some **calibrated peer review**
    • This is practice for the following; details follow

• **Between Tuesday, 3:30 PM and Thursday, 1:30 PM** *(sharp!)*
  – Perform your own **peer review** of three randomly assigned students' written questions.
    • We'll accumulate an *(anonymous)* "hall of fame" of excellent essays and peer reviews that you can use as further examples.

Course Website: [http://cs.ubc.ca/~kevinlb/teaching/cs430](http://cs.ubc.ca/~kevinlb/teaching/cs430)
Review of your Essays

• You'll receive 3 peer reviews of your work, each week
  – These reviews will be double-blind (you won’t know who reviewed you)
  – You’ll be graded on a five-point scale on four dimensions:
    • Was the essay well structured, stating a thesis, supporting it with argument(s) that are clearly related to this point and (if relevant) distinct from one another, and linking these arguments in a logical way?
    • Did the essay do a good job of making its case, choosing relevant arguments, backing them up with evidence and examples at an appropriate level of detail, and responding to contrary views as appropriate?
    • Did the essay demonstrate a good understanding of the course's subject matter, including both the topic and the wider context?
    • Was the essay presented clearly and in correct English?
  – You’ll also get comments on each item, and an outline of your essay

• When you also receive a review by a TA:
  – only the TA evaluation matters for your grade

• When you are evaluated only by peers:
  – your grade is the median of your peer grades
  – If you disagree you can appeal, and a TA will regrade your essay

• Essays are worth increasing amounts as the term goes on
  – 1.5, 2.5, 3.5 points (% of final grade) each week

Course Website: http://cs.ubc.ca/~kevinlb/teaching/cs430
Peer Review

1. **Calibrated peer review**
   - *Grading essays from previous years that we’ve graded already*
   - Confirms that we all **understand the grading scheme** in the same way, and shows you examples of weak and strong essays

2. **Supervised peer review**
   - *Grading essays from this year when you haven’t yet demonstrated proficiency at peer review*
   - A **TA will grade the same essays**, and only the TA grade will count
   - The **TA will also grade your peer review** (recall: 10% of final grade)

3. **Unsupervised peer review**
   - *Grading essays from this year once you’ve demonstrated proficiency*
   - By default, **you get a perfect grade** for every submitted review
   - Your review may be **spot checked or appealed**: checked by TA
     - Spot checks: very positive ratings; severe disagreements; random
   - This can put you back into the supervised pool
Peer Review: Reviewer Perspective

• Do **at least 3 calibrated reviews** (and as many as you want) before 1:30 Tuesday when you’re in the supervised pool
  – Week 1: this means everyone!
  – Week 2: only if you’re still in the unsupervised pool
  – Getting into the **unsupervised pool** (you can do this in week 1!):
    • Get a **review score** of at least 3.5. For every review, you match our assigned grade:
      – Exactly or differing in at most one point across all dimensions: +1
      – Differing in at most two points; no more than one point in any dimension +0.5
      – Differing in at most four points, no more than two points in any dimension: -0.25
      – Otherwise: -1
      – Score can’t fall below 0
    • Maintain an **average grade of 70% or more** on your graded reviews

• Do **3 reviews of others’ essays** before 1:30 PM Thursday

• How we’ll calculate **your peer review grade** (10% of the course):
  – graded reviews: you get **what the TA gives you**
  – ungraded reviews: you get a **perfect grade**
  – reviews worth increasing amounts: scaled to 0.6, 1, 1.4 points (%) per week
  – calibrated reviews, when supervised: **lose 50% of the week’s grade** if you don’t do ≥3
This all starts right away!

• For **next class** (Tuesday, September 10, 1:30 PM):
  - read all of Chapter 1 of the textbook
  - **perform a quiz online** using Connect (or you can’t do the essay)
  - log in to “Mechanical TA” and:
    - perform at least 3 calibrated peer reviews, preferably more
    - get an essay topic
  - write a short essay on your assigned topic
  - register your clicker in Connect, or you’ll miss out on grades
  - bring a laptop if you have one

• Don’t leave this to the last minute!
  - It might take you a bit of time to get your accounts set up, etc.

Course Website: http://cs.ubc.ca/~kevinlb/teaching/cs430
“What if something goes wrong, and I can’t submit an essay/review?”

• We’ll **drop your worst essay and peer review grades**, allowing for a situation in which:
  – you miss the (firm) deadline
  – you’re sick, out of town, have a conflict with another course, ...
  – you register for the course late
  – you get a poor grade on one essay
(We’ll renormalize your grades accordingly)

• Other extensions or waivers will be granted only in **truly exceptional circumstances**.
  – Unless you have an exceptional excuse, you’ll simply get a grade of zero.

Course Website: [http://cs.ubc.ca/~kevinlb/teaching/cs430](http://cs.ubc.ca/~kevinlb/teaching/cs430)
Textbook

- We will be using the textbook *Ethics for the Information Age, 5th Ed*, by Michael J. Quinn.
- It's important that you have a copy, because we'll be reading the whole thing—starting this week!
- **Copies on reserve** in the CS reading room
  - One 5th, one 4th edition

Course Website: http://cs.ubc.ca/~kevinlb/teaching/cs430
Topics (pretty cool stuff, actually 😊)

• History of computing, storage, networking (next 3 classes)
• Ethic & Argumentation (5 classes)
• Social issues (1 week each):
  – Networked communications  – Computer & Network Security
  – Intellectual Property  – Computer Reliability
  – Information Privacy  – Professional Ethics
  – Privacy and the Government  – Work & Wealth

• Rest of today:
  – break into 16 groups (count off from 1 – 16)
  – get assigned a statement and a position for or against
  – develop arguments for your assigned position
  – present your list to the class; we’ll discuss briefly
  – everyone votes on the issue (you vote freely)
  – we’ll revisit these questions throughout the course. You’ll get to see if your opinions change.

Course Website: http://cs.ubc.ca/~kevinlb/teaching/cs430
Networked Communications

“For the protection of children, all publicly accessible computers and wifi networks paid for with taxpayer money should be configured to block objectionable content.”
Intellectual Property

“The producers of software should have the right to prevent others from copying the software they produce.”
Information Privacy

“It should be illegal for a search engine to publicly disclose users’ search histories, even in anonymized form.”

AOL.com did this in August, 2006

Privacy and the Government

“The government should work to intercept all encrypted communications.”
“Canadians should have the right to vote online in federal, provincial and municipal elections.”
Computer Reliability

“Self-driving cars should be allowed to operate on public roads once they have been shown to be at least slightly safer than the average human driver.”
Professional Ethics

“A UBC CS sysadmin accidentally discovers pornography in a student’s private department file space, depicting a woman the sysadmin believes may be under 18. The sysadmin should inform the department head.”
Work and Wealth

“It is immoral for a corporation to pay its CEO 400 times as much as a production worker.”
