

Deliverable: #0 - Project Group Formation
Title: CS 410: Advanced Software Engineering

Description:

We will be building mobile apps this term in groups of four. You have the ability to self-select your group. If you cannot find a group of four on your own, we will create them **in class** on September 14. Once you have your group, you can register yourselves using our online system <http://coast.cs.ubc.ca:1337/>

Deliverable Requirements:

1. Find a team.
2. Make sure everyone has Github Ids (required for our online system).
3. Everyone needs to log into the system to associate their Github Id with their 410 account.
4. Only one person on the team needs to register the four people in the team.
5. The team name is currently optional, but will be set to your project app name once you submit your proposal.

Assessment:

This deliverable is Pass/Fail; everyone must have associated their Github Ids and been registered in a group by **0800 on Sept 25**. It is not possible to pass the course if this has not been completed.
