Why

Not football?

Most popular sport: 3.9 billion “followers”!

## Problems

- 170 professional leagues(5 big): no centralised entity
- Lots of data but very expensive (for media / teams)

# How

## INFO TMATION

### Robert Lewandowski

2015/2016

21 Aug 1988 (age 28)

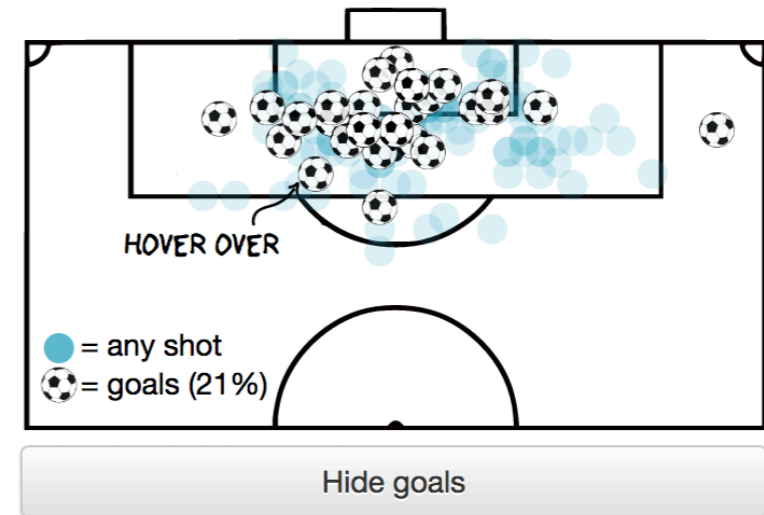

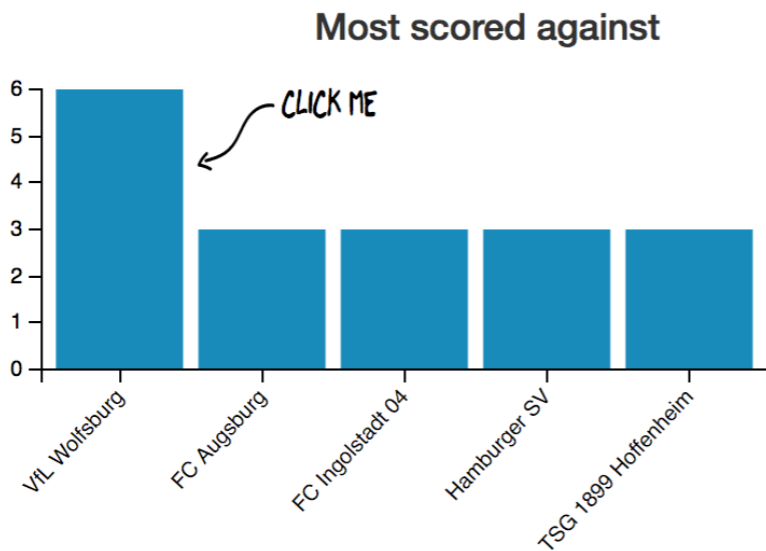

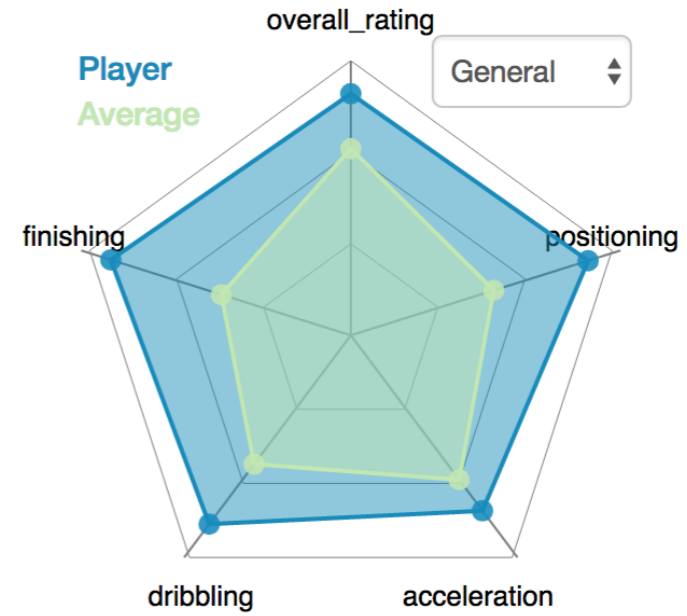

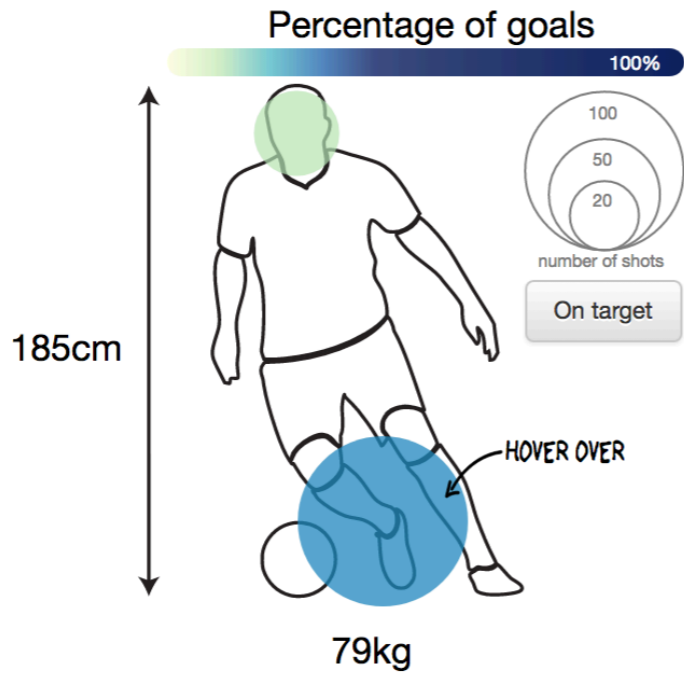

FC Bayern Munich

Striker

Right-footed

Value: € 71M

National team: Poland

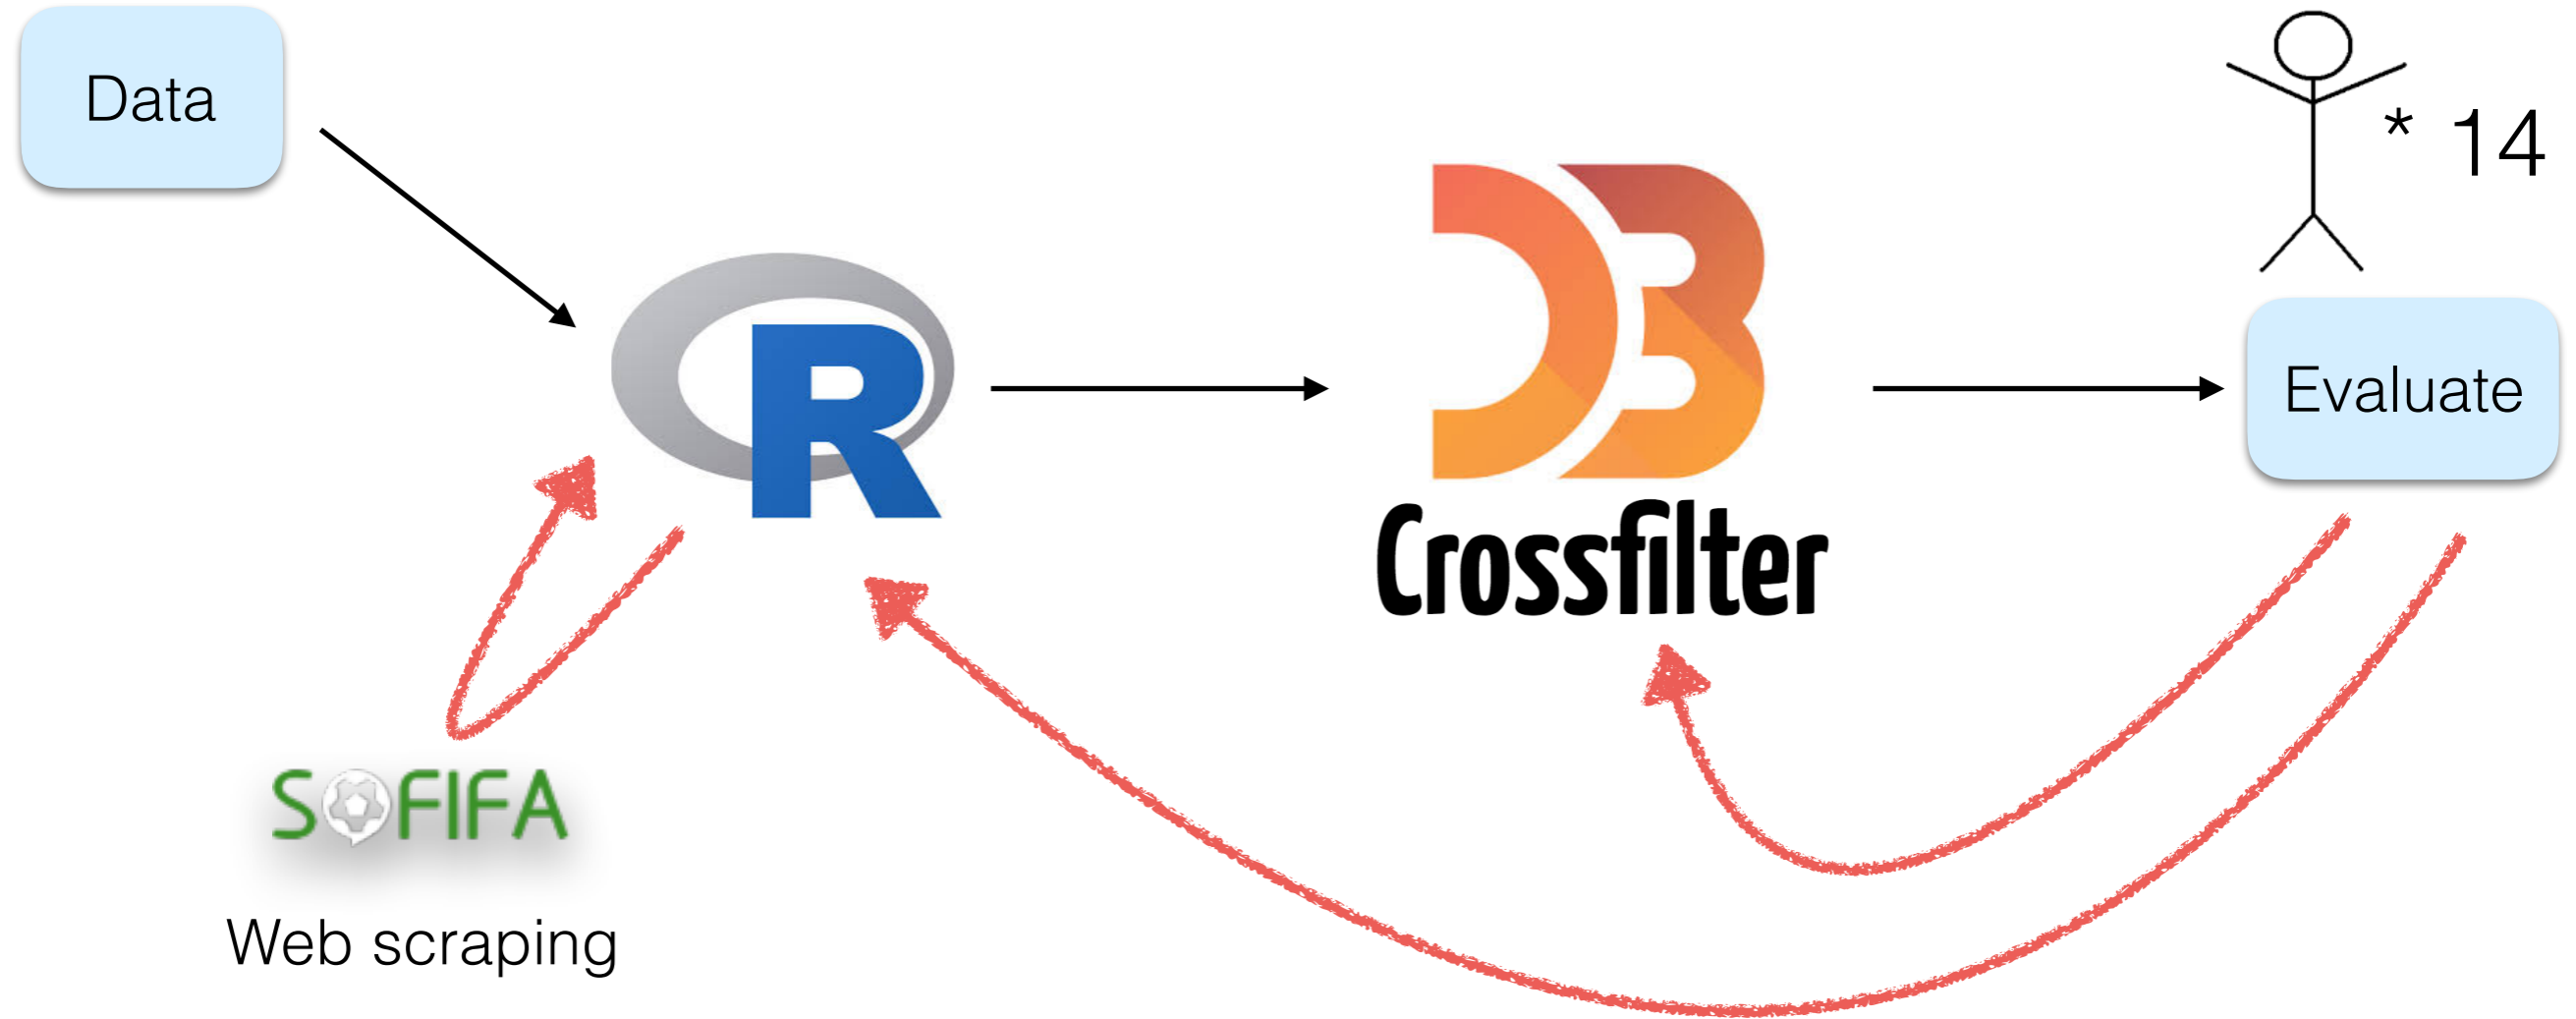

Demo: <https://yanndubs.github.io/Infofootmation/>

# Process

## And Tools

## Evaluation

### What and Who

- 14 football fans (12 Europeans)
- 20-25 years old
- “What do you like ?”
- “What would you change ?”
- “What would you add ?”

## Evaluation

### Their answers

## Changed

- Add general player information
- Surprised by interaction
- Silhouette graph not clear
- Add more legends / labels
- Add autocomplete search
- Optimize for mobile / different browsers

## To change

- Show assists on field
- Add more general stats: passes / interceptions / duels won / number of yellow or red cards
- Compare players
- Add data from international competitions
- Add more colours
- Search by teams
- Change default player ;)

## Future work

### More web scraping

- Daily update of the data
- Add data from international competitions
- Add more general statistics
- Get the distribution of shots by right/left foot
- Get passes information
- Get more information about position of player
