

UBCOURSE VIS: INTERACTIVE VISUAL REPRESENTATION OF UBC COURSE PRE-REQUISITES

PRESENTER: JIAHONG CHEN, SIYUAN HE INSTRUCTOR: PROF. TAMARA MUNZNER

Dec 12th, 2017

INTRODUCTION

Browse V Search V Help V Course Schedule / Browse Courses / CPSC / CPSC 340 Cempus: UBC Vancouver V Session: 2017 Winter V Outline/Syllabus Save To Worklist

Models of algorithms for dimensionality reduction, nonlinear regression, classification, clustering and unsupervised learning; applications to computer graphics, computer games, bioinformatics, information retrieval, e-commerce, databases, computer vision and artificial intelligence.

This course is eligible for Credit/D/Fail grading. To determine whether you can take this course for Credit/D/Fail grading, visit the <u>Credit/D/Fail</u> website. You must register in the course before you can select the Credit/D/Fail grading option.

Credits: 3

Pre-reqs: One of MATH 152, MATH 221, MATH 223 and one of MATH 200, MATH 217, MATH 226, MATH 253, MATH 263 and one of STAT 200, STAT 203, STAT 241, STAT 251, MATH 302, STAT 302, MATH 318, BIOL 300; and either (a) CPSC 221 or (b) all of CPSC 260, EECE 320 and one of CPSC 210, EECE 309.

Choose one section from all 2 activity types. (e.g. Lecture and Laboratory)

Status	Section	Activity	Term	Interval	Days	Start Time	End Time	Comments
Full	CPSC 340 101	Lecture	1		Mon Wed Fri	16:00	17:00	Section Comments
	CPSC 340 T1A	Tutorial	1		Tue	16:30	17:30	
	CPSC 340 T1B	Tutorial	1		Wed	9:00	10:00	
	CPSC 340 T1C	Tutorial	1		Wed	10:00	11:00	
Full	CPSC 340 T1D	Tutorial	1		Mon	17:00	18:00	
	CPSC 340 T1E	Tutorial	1		Tue	15:30	16:30	

How can we visualize pre-requisites of UBC courses?

BACKGROUND

- Derive complex relationship of pre-reqs from plain text
 - Mandatory groups pre-requisite courses.
 - Either-or selections about groups of pre-requisite courses.
 - All courses or one of courses in these groups should be selected to satisfy required.
- E.g., 22 courses directly related to CPSC 340, with 6 groups of prerequisite relationship in total.

BACKGROUND

- Pre-requisite courses of pre-reqs makes situation more complex
- Not all pre-requisite courses are needed depending on users' selection
- Duplicated/satisfied pre-requisites might appear
- Trade off between showing all information and neat design idiom

Multi-hop pre-reqs and duplicated pre-reqs

DATA TO VIS AND DERIVED RESULTS

- Dataset: UBC course schedule and description from UBC Student Service.
- Course pre-requisite relationship among courses provided by UBC
 - 7,521 courses; 8,381 relationships;
 - 6,931 mandatory pre-requisites;
 - 1460 either-or selections.
- Derived results
 - An interactive vis system, for exploring and making selections of courses

VAD Idiom	
What: Data	Network data with vertex and different types of edges
What: Derived	Pre-requisite courses and interactive selection
Scale	Thousands of courses and relations

OVERVIEW

VAD Idiom

How: Facet

Partition into multiple views: detail, overview and description

6

OVERVIEW

7

INTERACTIVE COURSE SELECTION

- By entering the course name, direct pre-requisites will be shown with detailed relationship.
 - Only one of courses in the vertical groups needs to be taken
 - Horizontal groups means mandatory pre-reqs or groups to be satisfied
 - Courses of different faculty has different color
 - Gray box means only one of either-or group should be satisfied
- Choose pre-reqs by name

INTERACTIVE COURSE SELECTION

 After selecting preferred courses (orange ones), pre-requisites will automatically presented

Selection of two-hop Pre-requisites

One pre-requisites selection for CPSC 340

UBC

INTERACTIVE COURSE SELECTION

VAD Idiom							
How: Encode	Node–Link Diagrams						
How: Encode	Colors for different courses						
How: Reduce	Duplicated/satisfied pre-reqs elimination						
Manipulate: Navigate	Zoom in						
Manipulate: Select	Select courses to take						
How: Encode	Spatial position for mandatory and optional course						

COURSE DETAILS

- Course details will be shown in this section:
 - Full course name
 - Course credits
 - Detailed course description

CPSC340 : Machine Learning and Data Mining

Credits: 3

Description: Models of algorithms for dimensionality reduction, nonlinear regression, classification, clustering and unsupervised learning; applications to computer graphics, computer games, bioinformatics, information retrieval, e-commerce, databases, computer vision and artificial intelligence. [3-0-1]

Detailed description of course

UBC

VAD Idiom

How: Encode

Map hops(derived) to radial distance

USER GENERATED NETWORK

VAD Idiom	
How: Encode	Edge width encode logical relation strength
How: Manipulate	Sort, Select, Add, Remove

OUR PREVIOUS WORK

UBC

• Uses containers with different hues

• Encodes complete logical information

• Intuitively difficult to understand

CONTRIBUTION AND FUTURE WORK

- Contribution
 - Novel vis system for UBC course registration
 - Exploring and making selections of pre-req
- Future work
 - Course Explorer (Displaying prerequisites(predecessors) and postdecessors on demand)
 - Redesign database

THE UNIVERSITY OF BRITISH COLUMBIA

Thank you!
