What animal can you take down?

Rules:

- The arena is the size of the entire 8th floor
- Primitive weapons only
- We're looking for a combination of size/danger level/coolness factor
- You can get hurt in the scuffle, no way we're all coming out unscathed
- If the animal would die later in the day from blood loss, that does not count. It's about who exists the arena in one piece
- You can add things that help equalize the fight but don't give an advantage like a breathing apparatus for underwater animals
- Doesn't have to be a normal animal, feel free to challenge a dog sized spider or a horse sized duck
- **Not a time to be humble**
